# BLACKTOP CRACK SEAL

**PRODUCT NOS. 8640-05****PRODUCT DESCRIPTION**

QUIKRETE® Blacktop Crack Seal is uniformly blended latex emulsion formulated to fill cracks in horizontal asphalt surfaces.

**PRODUCT USE**

QUIKRETE® Blacktop Crack Seal is formulated to fill cracks on any horizontal asphalt surface. Blacktop Crack Seal will also bond to concrete. There is nothing to add. Just shake the ready-to-use product and pour directly from the container. The product blends in with the natural charcoal color of aged blacktop.

**SIZES**

- QUIKRETE® Blacktop Crack Seal is available in 5.5 ounce (163 ml) squeeze tubes, one quart (946 ml) and one gallon (3.8 L) plastic bottles.

**YIELD**

- One quart (946 ml) bottle will fill a 1/4" x 1/2" (6 x 12 mm) crack 38' (11.6 M) long

**INSTALLATION****SURFACE PREPARATION**

Shake well before using. Clean all loose dirt, dust and gravel from the crack. Surfaces to receive Blacktop Crack Seal should be free of oil and grease. Cleaning with QUIKRETE® Concrete & Asphalt Cleaner (#8601) is recommended to insure the best bond. If the crack is deeper than 1/4" (6 mm), use backer rod or sand to fill the crack to within 1/4" (6 mm) of the surface.

**APPLICATION**

Cut the tip of the spout to make a 1/4" (6 mm) to 3/8" (9 mm) hole. Squeeze Blacktop Crack Seal into the crack, over-filling slightly to allow for shrinkage. A second coat can be applied after 24 hours as needed to provide a uniform finished surface.

**PRECAUTIONS**

- Do not apply in cracks wider than 1/2" (12 mm). Temperature should be between 45°F and 100°F (7°C and 38°C). Keep product from freezing. Do not apply if rain is expected within 24 hours. Do not apply to surfaces which will later be coated with anything other than acrylic water-based paint.
