

# Rmax Multi-Max® FA-3

## Insulation for Above the Deck

Rmax Multi-Max® FA-3 is an energy efficient thermal insulation board composed of a closed-cell polyisocyanurate (polyiso) foam core bonded to durable glass fiber/organic mat facers on both sides - making it compatible with virtually any roofing system.

Multi-Max® FA-3 is suitable for use in single ply, built-up, metal panel and modified bitumen roofing applications. This polyiso insulation is approved for use in new and retrofit/recover roofing constructions over steel, wood, non-combustible and certain types of nailable roof decks.

Rmax Multi-Max® FA-3 delivers the highest R-value per inch and offers a versatile solution for various roofing applications.

### Rmax Multi-Max® FA-3 Benefits

- Durable glass fiber/organic mat facers
- Delivers highest R-values - inch for inch
- Saves on energy dollars
- No thermal barrier required
- 25 psi compressive strength available
- Reduces material and labor costs
- Contributes toward LEED® credits
- Offers tax credit, where applicable
