Comfortboard[®]**80** Exterior Continuous Insulation

ROCKWOOL Comfortboard[®] 80 thermal insulated sheathing is a rigid stone wool insulation board designed for use as an exterior continuous insulation. Comfortboard[®] 80 does not produce smoke or propagate flames, keeping occupants safe and reducing property damage in the event of a fire. Vapor permeable, this solution allows fast outward drying, keeping moisture out of your wall assembly.

Certified by the California State Fire Marshall's Building Materials Listing Program (BML), Comfortboard® 80 has also received ICC-ES (CCMC 12718-R & 13573-L) validated product acceptance for the following uses:

- Non-structural thermal insulation in non-fire-resistive rated dwellings
- Exterior perimeter insulation around foundation
- Under flat concrete slab
- A component of residential wood-framed cathedral ceilings
- In areas where probability of termite infestation is 'very heavy'

Improved Thermal Performance

Comfortboard[®] 80 helps reduce thermal bridging through wood framing, leading to a higher-performing building envelope.

Comfortboard® 80 Exterior Continuous Insulation

ROCKWOOL Comfortboard[®] 80 is a rigid stone wool board designed for continuous insulation applications. A non-structural sheathing product, Comfortboard[®] 80 provides increased thermal performance to the building envelope.
