

Roseburg Green Wood Products

Firmly planted in the environment

Roseburg is one of North America's single largest producers of "Green" wood products. From construction wood products to value added decorative hardwood and melamine panels, we have the right green products for the job. All our green products are produced domestically from the finest raw materials available in the market. With Roseburg, you have virtually unlimited options.

Nationwide Distribution

Roseburg's "Green" products are available throughout North America at some of the largest and most respected distributors and retail companies. To find where you can purchase Roseburg products, go to www.Roseburg.com

Forest Stewardship Council

Most of the products produced by Roseburg are also available FSC certified. We have over 175,000 acres of FSC-certified timberlands and many of our facilities are FSC Chain-of-Custody.

- Roseburg's mills process and recycle 1.5 million tons of reclaimed wood waste annually, converting it into products that sequester carbon.
- Roseburg's particleboard and decorative surface panels with particleboard core are manufactured using 100 percent recycled or recovered wood fiber.
- Over 30 wood products manufactured by Roseburg are (NAUF) No Added Urea Formaldehyde.
- Vertically integrated manufacturing reduces carbon footprint.
- Products are produced primarily from resources on Roseburg's 625,000 acres of sustainably managed timberlands in Oregon and California.
- 5 million seedlings are planted each year insuring green products will be available for many years to come.
