AIR/WATER-RESISTIVE BARRIERS

SENERSHIELD-R, SENERSHIELD-RS AND SENERSHIELD-VB are one component fluid-applied air/water-resistive barriers. Waterproof and resilient and may be applied via sprayer, roller, trowel or brushed directly to approved wall substrates. Provides excellent secondary moisture protection behind most wall claddings including EIFS, stucco (slip sheet required), brick, siding, and metal panels.

Poured Concrete	500 at 10 mils	575 at 12 mils	290 at 26 mils

Roll or spray / backroll for optimum coverage rate. Other application methods may provide less coverage. Actual results may vary depending on surface porosity, roughness, moisture uptakes, type of OSB or other factors.

ACCESSORY PRODUCTS

SIKAWALL SHEATHING FABRIC: a reinforced non-woven polyester fabric designed for use with Senersshield-R, Senersshield-RS or Senersshield-VB air/water-resistive barriers and tested in accordance with ICC-ES acceptance criteria AC212 for water-resistive barrier coatings, AC 148 for flexible flashing and ASTM E2357 for air barrier assemblies.

SIKAWALL FLASH SEAL NP: a 30-mil thick, self-adhering and sealing composite membrane of polyester fabric and butyl adhesive. Used as an air barrier accessory to connect different air barrier materials or assemblies together to make the air barrier continuous and as an expansion joint seal.

SIKAWALL MAXFLASH: a one-component, gun-grade, elastomeric material for use as a flexible waterproofing flashing membrane for rough openings. It can also be used to prepare sheathing joints for subsequent application of Senergy air/water-resistive barrier membranes.
