

The Chemical Company

January 17, 2012

Subject: **MSDS for Mesh Products**

To Whom It May Concern:

Please note that regulations regarding MSDS require all companies that manufacture or distribute hazardous chemicals to provide a specifically formatted MSDS for that hazardous chemical to all who need or request one.

BASF is a Responsible Care® company and, in being so, demonstrates the highest commitment to Product Stewardship and the proper handling of all hazardous chemical products that are marketed and/or distributed. The safety of the end users of our products is of the highest priority to us.

With regard to mesh products and PermaLath®, these products are not chemicals and in fact are regarded as articles rather than chemicals. Being such, MSDS on these articles are not required under the OSHA laws and regulations.

I hope this meets your needs. If you have any questions, please contact our Technical Service Department.
