

SIKA EIFS & STUCCO SPECIALTY FINISHES

SELECTION GUIDE

BUILDING TRUST

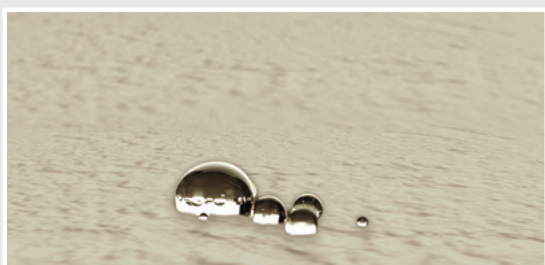

SikaWall® FINISHES

COLOR, TEXTURE & PROTECTION

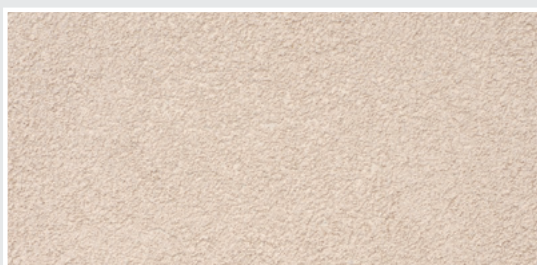

SIKAWALL® SPECIALTY FINISHES GO BEYOND THE LIMITATIONS OF TRADITIONAL CEMENT-BASED COATINGS, DELIVERING SUPERIOR PERFORMANCE THROUGH ADVANCED 100% ACRYLIC POLYMER TECHNOLOGY. Engineered for long-term durability and resistance to dirt pick-up, these finishes offer exceptional weatherability and aesthetic versatility.

Whether you're aiming for a classic stone or brick, a bold metallic sheen, or a mottled stucco effect, SikaWall® Specialty Finishes offers cost effective solutions to complement any architectural style—without compromising on performance or design .

HYDROPHOBIC FINISHES

Parex Aquasol, Senergy Tersus, and LaHabra Tersus finishes are designed to provide excellent water repellency and enhanced resistance to environmental soiling. When rainwater contacts the surface, it beads and carries away dirt, soil and debris in its pathway. The built in anti-soiling properties of the finishes resist dirt and staining, reducing maintenance costs and extending a building's aesthetic appeal.

ELASTOMERIC FINISHES

Parex Elastomeric Finish and SikaWall-6200 Maxlastic are acrylic-based elastomeric finishes that are flexible and weatherproof, specifically designed to protect cement-based substrates with hairline cracks (smaller than 1/32") that may expand and contract due to extreme temperature changes.

ULTRA SMOOTH FINISHES

SikaWall Ultra Smooth finishes create an aesthetically pleasing surface color and ultra smooth texture. The 100% acrylic polymer finish coat utilizes a uniformly-sized particle distribution.

WOOD GRAIN EFFECT

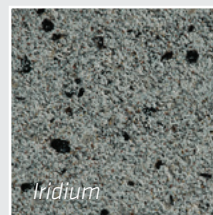

Create the warm, inviting look of wood panels with Sika's Wood Grain Effect. The finish technique is created with Sika standard acrylic texture finish tinted to Wood Grain Effect Neutral Gray and SikaWall-4080 Color Advance Coating tinted in two colors to create the look of wood grain panels in a light weight, easily installed architectural wall finish.

SIKAWALL®-4020 GRANITE & STONE FINISH

SikaWall-4020 Granite & Stone Finish provides a classic granite or marble-like textured finish appearance. The factory-mixed, reflective stone finish consists of colored aggregate and large black mica flakes in a 100% acrylic transparent binder.

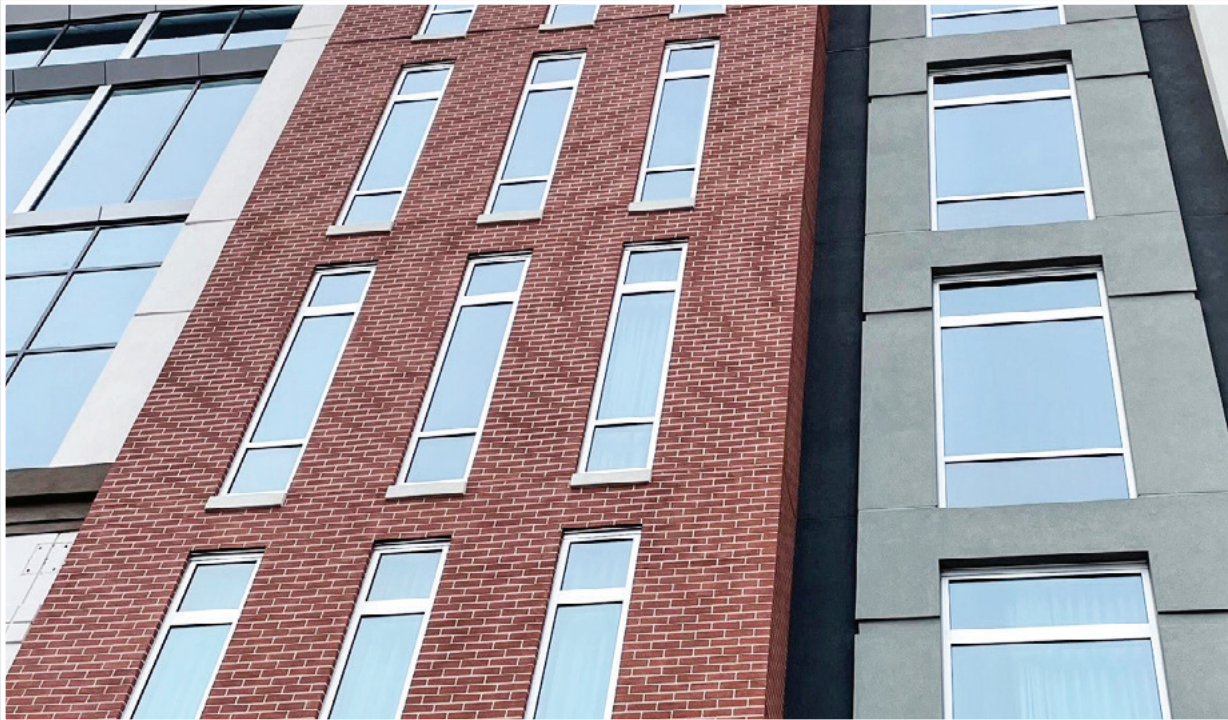

SIKAWALL®-6230 CHROMA FINISH

Vibrant and bold, high performance colorants integrated into 100% acrylic polymer finishes formulated with advanced technology for superior fade resistance, improved long-term performance and dirt pick-up resistance.

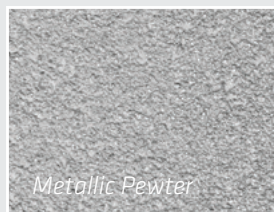

BRICK STENCIL

The look of brick can be achieved by using brick finish techniques that utilize special templates and Sika Acrylic Finishes. Sika Brick Stencil surfaces yield the appearance of a wide variety of brick veneers over any Sika EIFS or Stucco System or other approved substrates.

SIKAWALL®-6260 METALLIC FINISH

Create durable, lightweight metallic panels with SikaWall®-6260 Metallic Finish. Factory-mixed, 100% acrylic polymer finish coat. Metallic Finish has a pearlescent appearance. It utilizes uniformly-sized aggregates for a uniform fine texture. Available in a variety of colors.

OLD WORLD COLLECTION

SIKAWALL-421 ALTO

SikaWall-421 Alto finish provides a smooth, mottled appearance both suitable for interior and exterior applications.

SIKAWALL-424 TUSCAN STUCCO

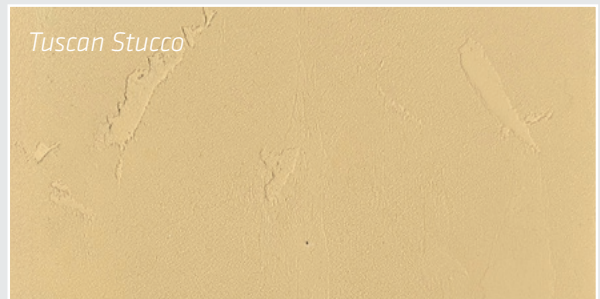

SikaWall-424 Tuscan Stucco is a finish with a warm rustic effect and simple application. As a tintable and sandable finish, Tuscan Stucco has a wide range of texture and color possibilities.

Brio

Omniccoat

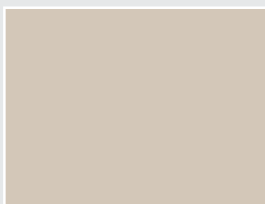

SIKAWALL-423 OMNICOAT

SikaWall-423 Omniccoat can be trowel or spray applied to level new or existing textured or imperfect surfaces, creating a smooth base ready for texture, paint, or SikaWall Finishes. With unlimited color possibilities, OmniCoat is the most affordable decorative wall finish available.

SIKAWALL-429 BRIO

SikaWall-429 Brio can create a Venetian plaster-style finish, characterized by a high polish and distinct mottling.

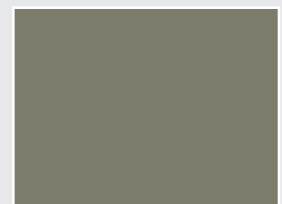

Aspen

Autumn Leaf
