ENDURO® 600 MACRO-SYNTHETIC FIBER

ENDURO® 600 is the latest high performance macro-synthetic fiber developed from the innovative HPP technology which was pioneered and patented by Propex Concrete Systems. ENDURO 600 has been specifically designed to satisfy the demanding requirements of modern day shotcrete reinforcement and equipment.

FEATURES & BENEFITS
- Geometrically engineered to resist matrix pullout
- Increases flexural toughness • Reduces rebound
- Increases cohesion and reduces segregation
- Increases impact and shatter resistance
- Non-magnetic
- Rustproof
- Chemically inert and alkali proof
- Reduced wear on concrete pumps and hoses
- Safe and easy to handle
- Simplified logistics
- Economical alternative to steel wire mesh and/or steel fibers

PRIMARY APPLICATIONS
- Ground support and stabilization
- Marine structure repair and rehabilitation
- Retaining walls and soil nailing
- Lining large underground cavities
- Aqueduct rehabilitation
- Mining
- Structural rehabilitation
- Seismic retrofits
- Channel linings
- Slope stabilization

COMPLIANCE
Complies with ASTM C 1116 Type III 4.1.3

CHEMICAL AND PHYSICAL PROPERTIES
- Absorption: Nil
- Specific Gravity: 0.91
- Fiber Length*: 2.0 in
- Electrical Conductivity: Low
- Acid & Salt Resistance: High
- Melt Point: 328°F (164°C)
- Ignition Point: 1022°F (>550°C)
- Thermal Conductivity: Low
- Alkali Resistance: Alkali Proof

*Fiber Length
PRODUCT USE

MIXING DESIGNS AND PROCEDURES: The specified dosage per cubic meter should be added to the mixer after batching the other concrete materials. After the addition of the fibers, the concrete should be mixed for sufficient time (minimum 5 minutes) to ensure uniform distribution of the fibers throughout the concrete mix. ENDURO® 600 macro-synthetic polypropylene fibers can be pumped, shot or placed using conventional equipment as with other fibrous concrete.

FINISHING: Conventional techniques and equipment can be used when finishing ENDURO 600 fiber concrete.

APPLICATION RATE: The application rate for ENDURO 600 macro-synthetic fibers will vary depending on the application, mix design and the toughness requirements of each particular project. Typically, ENDURO 600 macro-synthetic fibers dosage will be in the range of 8 lbs to 15 lbs per cubic yard (5 kgs to 9 kgs per cubic meter) of concrete. When used in conjunction with Fibermesh® 150 fibers the dosage rate and the performance of the sprayed concrete can be optimized economically. Propex Concrete Systems technical staff can offer advice on dosage requirements once performance requirements have been established by the project designer/ engineer.

COMPATIBILITY

ENDURO 600 macro-synthetic fibers are compatible with all curing compounds, superplasticizers, water reducers, hardeners and coatings.

SAFETY

No special handling is required with ENDURO 600 macro-synthetic fibers. Full Material Safety Data Sheets are available on request.

REFERENCE DOCUMENTS

- ACI 304 Guide for Measuring, Mixing,Transporting and Placing Concrete.

PACKAGING

ENDURO 600 macro-synthetic fibers are collated in degradable paper wrapped bundles or pucks to aid rapid dispersion and mixing. The fiber bundles are packaged in 7 kg cartons. Store materials in a cool dry place. Do not store in direct sunlight.

TECHNICAL SERVICES

Propex is backed by our team of reinforced concrete specialists who can carefully analyze each project and provide fiber reinforced concrete design solutions to ensure maximum project performance and cost efficiency.

SPECIFICATION CLAUSE

Fibers for concrete shall be ENDURO 600 polypropylene/polyethylene high performance macro-monofilament fiber and manufactured specifically for the reinforcement of concrete. ENDURO 600 macro-synthetic fibers shall be mixed at the batch plant, at the recommended rate of ......kgs/m3, and mixed for sufficient time (minimum 5 minutes) to ensure uniform distribution of the fibers throughout the concrete mix. Fibrous concrete reinforcement shall be manufactured by Propex Concrete Systems, 6025 Lee Highway, Suite 425, PO Box 22788, Chattanooga,TN, 37422, USA, tel: 423 892 8080, fax: 423 892 0157, web site: fibermesh.com.
