SIKA FIBERMESH 650 MACRO-SYNTHETIC FIBER

Sika Fibermesh 650 is an engineered graded macro-synthetic fiber featuring e3 patented* technology manufactured to an optimum gradation and highly oriented to allow greater surface area contact within the concrete resulting in increased inter-facial bonding and flexural toughness. Fibermesh 650 is made with 100% virgin olefin materials. Specifically engineered and manufactured in an ISO 9001 certified manufacturing facility for use as concrete reinforcement.

*Covered by US Patent # 5628822, 5456752

FEATURES & BENEFITS
- Graded macro-synthetic fiber for concrete reinforcement
- Alternative to traditional steel wire fabric and rebar
- Provides impact, abrasion and shatter resistance
- Greater surface area provides increased flexural toughness (residual strength)
- Improved ductility
- Provides improved durability
- Control of drying shrinkage and temperature cracking
- Pumpable reinforcement

PRIMARY APPLICATIONS
- Slabs-on-ground
- Overlays & toppings
- Parking areas
- Exterior pavements
- Parking areas
- Shotcrete
- Composite metal decks

COMPLIANCE
- Complies with European Standard EN 14889-2:2006 Fibres for Concrete Part 2: Class II and carries CE marking
- UL Classified: For use as an alternate or in addition to the welded wire fabric used in Floor-Ceiling D700, D800, D900 Series Designs. Fibers may also be used in Floor-Ceiling Design Nos. G229, G243, G256, G514
- Complies with ASTM C 1116/C 1116M, Type III fiber reinforced concrete
- ISO 9001 Quality Assured Facility

PRODUCT USE

MIXING: Fibermesh 650 macro reinforcing is a mechanical, not chemical, process. Due to fiber efficiency, minor mix design modifications may be required depending on the application. Consult your Sika Fiber representative for recommendations. Fibermesh 650 fiber is added to the mixer during or after batching the other concrete materials. After the addition of the fibers, the concrete should be mixed for a sufficient time (batch plant: minimum 5 minutes or 70 revolutions) at full mixing speed to ensure uniform distribution of the fibers throughout the concrete mix. Mixing times may vary, please contact Sika Fiber representative.

PLACING: Fibermesh 650 macro-reinforced concrete can be pumped, sprayed or placed using conventional equipment.

FINISHING: Fibermesh 650 macro-reinforced concrete can be finished by normal finishing techniques.

APPLICATION RATE: The standard application rate for Fibermesh 650 fibers is a minimum 3 lbs/yd³, (2 kg/m³). For specific performance and dosage recommendations see your local Sika Fiber representative.

COMPATIBILITY

Fibermesh 650 fibers are compatible with all concrete admixtures and performance enhancing chemicals.

SAFETY

No special handling is required with Fibermesh 650 fibers. Full Safety Data Sheets are available upon request.

PACKAGING

Fibermesh 650 macro-synthetic fibers are available in 1.5 lb (0.68 kg) toss-in degradable bags. Bags are packed into cartons, palletized and shrink-wrap ed for protection during shipping. Other packaging options are available. Store materials in a cool dry place. Do not store in direct sunlight.

TECHNICAL SERVICES

Trained Sika Fiber specialists are available worldwide to assist and advise in specifications and field service. Sika Fiber representatives do not engage in the practice of engineering or supervision of projects and are available solely for service and support of our customers.

SPECIFICATION CLAUSE

Fibers for concrete shall be Sika Fibermesh 650, 100 percent virgin polyolefin fibers, e3 patented technology, containing no reprocessed olefin materials. The fibers shall conform to ASTM C1116 Type III and manufactured specifically for the reinforcement of concrete.

The fibers shall be manufactured in an ISO 9001 certified manufacturing facility. Unless otherwise stated, Sika Fibermesh 650 macro-synthetic fibers shall be mixed at the batch plant, at the recommended rate of ... lbs/yd³ (.... kgs/m³), and mixed for sufficient time (minimum 5 minutes) to ensure uniform distribution of the fibers throughout the concrete mix. Fibrous concrete reinforcement shall be manufactured by Sika Fibers LLC, 4019 Industry Drive, Chattanooga, TN. 37416 USA, tel: 833.236.1255, web site: www.Fibermesh.com.
