

SikaHyflex®-407 EverFlash Universal

UNIVERSAL FLASHING AND WEATHER BARRIER SEALANT

- Bonds to low surface energy substrates like polyethylene, polypropylene and polyolefins
- For any transitions, termination and other details that require adhesion to low surface energy substrates
- Paintable after sealant develops a skin
- Compatible with asphalt adhesive backed peel & stick products.
- Bonds to over 100 membranes and surfaces tested and counting!

Packaging available 20 fl.oz. Unipack (600ml)

SikaHyflex®-407 EverFlash Universal UNIVERSAL FLASHING AND WEATHER BARRIER SEALANT

WHERE TO USE

- Peel & stick window flashing and wraps, nonwoven spunbound window flashing and wraps, polyethylene wraps, polyethylene surfaces, polypropylene surfaces, common polyolefins, PVCX, steel, metal, aluminum, glass.
- All connection details specified in a building envelope to achieve a weather tight building.
- Between flanged windows and weather barriers.
- Termination and transition seals details where flashing meets building envelope.
- Window and door perimeters where movement is applicable
- Connections between the building envelope wrap and roofing systems.
- Where sealant comes in contact with asphaltic/ bituminuous surfaces that would normally bleed when a polyurethane sealant is used.

- Sealing around penetrations in weather/air barrier and flashing materials.
- Self adhered air and vapor barrier field-cut edges, T-joints, reverse laps and terminations.

FEATURES AND BENEFITS

- Unprimed adhesion to challenging low surface tension surfaces such as polyethylene, polypropylene and polyolefins
- Compatible with bituminous and asphalt based materials will not cause bleeding.
- Excellent long term UV and weatherability.
- Can be painted over with most acrylic coatings.

*Always refer to Current Product data Sheet and SDS for detailed performance specifications prior to use.
