### Storage:

P405 Store locked up.

### Disposal:

P501 Dispose of contents/ container to an approved waste disposal plant.

### **Additional Labeling**

There are no ingredients with unknown acute toxicity used in a mixture at a concentration >= 1%.

### Other hazards

None known.

### **SECTION 4. FIRST AID MEASURES**

| General advice  | : | Move out of dangerous area.<br>Consult a physician.<br>Show this material safety data sheet to the doctor in attend-<br>ance.  |
|---|---|--|
| If inhaled  | : | Move to fresh air.   |
| In case of skin contact                                     | : | Take off contaminated clothing and shoes immediately.<br>Wash off with soap and plenty of water.   |
| In case of eye contact                                      | : | Remove contact lenses.<br>Keep eye wide open while rinsing.<br>If eye irritation persists, consult a specialist.   |
| If swallowed  | : | Clean mouth with water and drink afterwards plenty of water.<br>Do not induce vomiting without medical advice.<br>Do not give milk or alcoholic beverages.<br>Never give anything by mouth to an unconscious person. |
| Most important symptoms and effects, both acute and delayed | : | No known significant effects or hazards.<br>No information available.<br>May cause cancer by inhalation.   |

| Notes to physician                                | : | Treat symptomatically.  |
| SECTION 5. FIRE-FIGHTING MEA                      | s | JRES  |
| Suitable extinguishing media                      | : | Use extinguishing measures that are appropriate to local cir-<br>cumstances and the surrounding environment.  |
| Further information                               | : | Collect contaminated fire extinguishing water separately. This<br>must not be discharged into drains.<br>Fire residues and contaminated fire extinguishing water must<br>be disposed of in accordance with local regulations. |
| Special protective equipment<br>for fire-fighters | : | In the event of fire, wear self-contained breathing apparatus.  |

## SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protec- :<br>tive equipment and emer-<br>gency procedures | Use personal protective equipment.<br>Deny access to unprotected persons.  |
|---|--|
| Environmental precautions :   | Try to prevent the material from entering drains or water<br>courses.<br>Local authorities should be advised if significant spillages<br>cannot be contained.  |
| Methods and materials for :<br>containment and cleaning up                      | Soak up with inert absorbent material (e.g. sand, silica gel,<br>acid binder, universal binder, sawdust).<br>Keep in suitable, closed containers for disposal. |

## SECTION 7. HANDLING AND STORAGE

| Advice on protection against fire and explosion | : | Normal measures for preventive fire protection.   |
|---|---|---|
| Advice on safe handling                         | : | Avoid exceeding the given occupational exposure limits (see<br>section 8).<br>For personal protection see section 8.<br>Smoking, eating and drinking should be prohibited in the ap-<br>plication area.<br>Follow standard hygiene measures when handling chemical<br>products.     |
| Conditions for safe storage                     | : | Store in original container.<br>Keep container tightly closed in a dry and well-ventilated<br>place.<br>Containers which are opened must be carefully resealed and<br>kept upright to prevent leakage.<br>Observe label precautions.<br>Store in accordance with local regulations. |

The above constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

| Engineering measures          | :  | Use of adequate ventilation should be sufficient to control<br>worker exposure to airborne contaminants. If the use of this<br>product generates dust, fumes, gas, vapor or mist, use pro-<br>cess enclosures, local exhaust ventilation or other engineer-<br>ing controls to keep worker exposure below any recommend-<br>ed or statutory limits. |
|-------------------------------|----|---|
| Personal protective equipment | nt |   |
| Respiratory protection        | :  | Use a properly fitted NIOSH approved air-purifying or air-fed respirator complying with an approved standard if a risk as-<br>sessment indicates this is necessary.   |
|                               |    | The filter class for the respirator must be suitable for the max-<br>imum expected contaminant concentration<br>(gas/vapor/aerosol/particulates) that may arise when han-<br>dling the product. If this concentration is exceeded, self-<br>contained breathing apparatus must be used.   |
| Hand protection               | :  | Chemical-resistant, impervious gloves complying with an<br>approved standard should be worn at all times when handling<br>chemical products if a risk assessment indicates this is nec-<br>essary.  |
| Eye protection                | :  | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.   |
| Skin and body protection      | :  | Choose body protection in relation to its type, to the concen-<br>tration and amount of dangerous substances, and to the spe-<br>cific work-place.  |
| Hygiene measures              | :  | Wash hands before breaks and immediately after handling<br>the product.<br>Remove contaminated clothing and protective equipment<br>before entering eating areas.   |

### Product:

Remarks

### Titanium dioxide (13463-67-7)

In lifetime inhalation studies of rats, airborne respirable-size titanium dioxide particles have shown to cause an increase in lung tumors at concentrations associated with substantial particle lung burdens and consequential pulmonary overload and inflammation. The potential for these adverse health effects appears to be closely related to the particle size and the amount of the exposed surface area that comes into contact with the lung. However, tests with other laboratory animals such as mice and hamsters, indicate that rats are significantly more susceptible to the pulmonary overload and inflammation that causes lung cancer. Epidemiological studies do not suggest an increased risk of cancer in humans from occupational exposure to titanium dioxide. Titanium dioxide has been characterized by IARC as possibly carcinogenic to humans (Group 2B) through inhalation (not ingestion). It has not been characterized as a potential carcinogen by either NTP or OSHA.

Quartz (14808-60-7): This classification is relevant when exposed to Quartz (silicon dioxide) in dust or powder form only, including cured product that is subject to sanding, grinding, cutting, or other surface preparation activities.
