

# CONCRETE

## Sikament<sup>®</sup>-475 MULTI-RANGE WATER REDUCING & WORKABILITY RETAINING ADMIXTURE

- Increases Workability Retention Without Significantly Delaying Set Times
- Enhances Early and Later Age Strength and Concrete Durability
- Improves Cement Optimization Compared to Conventional Mid-Range Water Reducers
- Improves Pumpability and Reduces Stickiness
- Improves Concrete Finishability and Surface Appearance

# Sikament<sup>®</sup>-475

## MULTI-RANGE WATER REDUCING & WORKABILITY RETAINING ADMIXTURE

Sikament<sup>®</sup>-475 is a single admixture for water reduction and slump retention that is recommended for use in the production of conventional ready mixed concrete. Sikament<sup>®</sup>-475 utilizes Sika's ViscoCrete<sup>®</sup> Technology containing the latest slump controlling polymer technology. Sikament<sup>®</sup>-475 has unique multi-range characteristics with enhanced strength properties allowing for cement optimization. Sikament<sup>®</sup>-475 is designed to meet the requirements of ASTM C-494 Type A and Type F.

### PRODUCT HIGHLIGHTS:

- Ideal for all season use
- Mid-range and high range water reduction
- Improved strength at same water cement ratio
- Improved slump retention eliminates need to add water to concrete at the job site
- Allows contractors to finish the concrete early
- Improved cohesion, reduced stickiness & improved finishability

\*HRWR- High range water reducing admixture • Dosage mentioned in bracket ( ) is fl. oz / 100 lbs. of Cm
