

# Discontinued Products: Fasteners

## Products Discontinued 2018–Present

Simpson Strong-Tie is dedicated to continuously expanding our line of Fastening Systems solutions with innovative new products that address the changing needs of our customers. As new fastener solutions are introduced that improve upon older designs, it becomes necessary to discontinue the old versions in the name of efficiency and product-line simplicity. The list below consists of products that are no longer included in our product lineup going forward as well as the products recommended to replace them.

While technical information for discontinued products will be maintained on our website for a number of months, Simpson Strong-Tie asks that our customers begin to substitute the replacement products shown below in their designs and inventories. While it is hard to say when the discontinued items will no longer be available from our distribution partners, production has ended and the products will phase out as we sell through inventories based on customer demand. Verify with the designer prior to substituting a replacement item for the specified product. If you have questions about any of the products shown below, please call **(800) 999-5099** for assistance.
