

SINAK
SUSTAINABLE BUILDING SOLUTIONS

ENHANCED FLOORING PROTECTION

HS-30 HIGH SHEEN SEALER

SINAK HS-30 is a VOC compliant sealer that provides etch and stain resistance with a high sheen finish. This spray applied coating is designed for protecting interior/exterior concrete, epoxy, gypsum, methyl methacrylate, polyurethane, wood and terrazzo against chemical intrusion and staining.

HS-30 offers ultimate protection and will not require reapplication for a minimum of five years. HS-30 provides a chemically stable solution that is UV stable and will not cloud or blush over time. HS-30 is easy to apply and does not require backrolling, microfibering or burnishing.

The versatility of SINAK's sealer technology is unparalleled in the industry and offers a unique product solution that provides long term protection for interior and exterior surfaces. Contact SINAK for a sample and quote for your next project.

Your maintenance budget will thank you.
