

# WCE™

## CONCRETE CURING AGENT

**SINAK WCE™ is a ready to use, zero VOC Curing Agent, Water-Cure Equivalent Type, that outperforms all traditional curing methods. WCE™ is proven to prevent cure related cracking and crazing while eliminating slab curling. WCE™ is non-toxic, contains no solvents, and is listed as UL® GREENGUARD Gold Certified and super compliant with SCAQMD.**

## FEATURES & BENEFITS

- 14-DAY WATER CURE EQUIVALENT
- ELIMINATES SLAB CURL
- EXCEEDS ASTM C-309 & ASTM C-1315
- UL GREENGUARD GOLD CERTIFIED
- CONTRIBUTES TO LEED V4 CREDITS

WCE™ chemically replicates 14-day water cure results and assures that the specified design strengths will be achieved along with improved durability and reduced permeability. WCE™ does not interfere with tilt panel bond breakers, joint sealants, patching, surface coatings, paints, lane markers, or cement wash treatments.

SINAK Corporation's line of curing agents are the first of their kind to surpass both ASTM C-309 and ASTM C-1315 standards for performance and moisture retention. WCE™ is available as a Type 1 and 1-D, Class A cure.

## WHERE TO USE WCE™

- CONCRETE FLOORS/DECKS
- ROADS AND BRIDGES
- SHOTCRETE
- STRUCTURAL CONCRETE
- PRECAST CONCRETE
- VERTICAL APPLICATIONS
- TILT UP CONSTRUCTION
