

Terapro VTS Pro Fleece Reinforced

PMMA-based waterproofing system

Description:

Terapro VTS (Versatile Traffic Surfacing) Pro Fleece Reinforced system provides waterproofing protection for vehicular and pedestrian surfaces in areas over occupied and conditioned spaces. It is suitable for heavy traffic zones in parking garages, including ramps and turning areas, and balconies, terraces, and walkways exposed to weather elements.

This liquid-applied PMMA resin-based system is designed to provide additional protection against wearing, as the Terapro Base Resin is layered with Pro Fleece reinforcement. And its fast-curing* application can help provide a quicker return to service.

The hard-wearing VTS system is completed with a layer of Pro Color Finish. The Pro Color Finish palette includes 16 standard color options that are long-wearing and appropriate for traffic and safety markings and decorative applications.

NOTE: Special color matching is available with a minimum batch order and the color match form completed.

Suitable for:

- Parking deck turning ramps and exposed areas
- Vehicular areas over occupied/conditioned space
- Terraces and balconies over occupied/conditioned space
- Pedestrian walkways

Advantages:

- Resists shear loads from vehicular traffic[†]
- Full-surface adhesion and helps create an impermeable membrane
- Fast-curing – ready for traffic in approximately 3 hours* when installed properly
- Provides protection against typical vehicular fluids[‡]
- Tested in accordance with ASTM E303 to provide skid resistance
- Can be applied in temperatures as low as 32°F
- Low VOC – formulated without solvents and isocyanate
- Contains additional wearing layer to protect the reinforced waterproofing
