

Terapro VTS Unreinforced

PMMA-based concrete protection system

Description:

Terapro VTS (Versatile Traffic Surfacing) Unreinforced system provides concrete protection for vehicular and pedestrian surfaces in areas over unoccupied spaces. It is suitable for heavy traffic zones in parking garages, including ramps and turning areas, and balconies, terraces, and walkways exposed to weather elements.

This liquid-applied PMMA resin-based system with tough crystal quartz surfacing provides exceptional durability with flexible and fast-curing* application to help meet scheduling requirements and help provide a quicker return to service.

The hard-wearing VTS system is completed with a layer of Pro Color Finish. The Pro Color Finish palette includes 16 standard color options that are long-wearing and appropriate for traffic paths, safety markings, and decorative applications.

NOTE: Special color matching is available with a minimum batch order and the color match form completed.

Suitable for:

- Parking decks and ramps over unoccupied space
- Vehicular areas over unoccupied space
- Terraces and balconies over unoccupied space
- Pedestrian walkways

Advantages:

- Resists shear loads from vehicular traffic[†]
- Full-surface adhesion and helps create an impermeable membrane
- Fast-curing – ready for traffic in approximately 3 hours* when installed properly
- Provides protection against typical vehicular fluids[‡]
- Tested in accordance with ASTM E303 to provide skid resistance
- UV stable
- Can be applied in temperatures as low as 32°F
- Low VOC – formulated without solvents and isocyanate
