

A Premium Blue Reactive Form Release Agent

A chemically active concrete form release agent specifically designed for use on aluminum forms. The reactivity of Ultra Blue is perfectly matched to do the challenging job of ensuring a clean release on pour while keeping aluminum forms free of concrete buildup. Protect and maximize the utility of your aluminum forming investment with Ultra Blue.

✔ Benefits

- Improves release of aluminum formwork
- Reduces concrete build-up on formwork and liners
- Reduces cleaning of formwork
- Protects steel formwork against rust
- Leaves no residue, stain or discoloration

Packaging

- 5 gallon pail (18.9 liters)
- 55 gallon drum (208.2 liters)
- 275 gallon tote (1040.9 liters)

Usage

- Chemically releases concrete from plywood, steel, aluminum, polystyrene, and fiberglass forms and formliners
- Helps eliminate bugholes
- Properly applied, will not inhibit bonding of secondary toppings, coatings, or adhesives
