

# MATERIAL CERTIFICATION:

## CODE APPROVALS AND PERFORMANCE

We certify and guarantee that materials supplied by Mill Steel Framing meet or exceed the ASTM International Standards and comply with the requirements of the Federal Specifications for each product as indicated.

### ASTM INTERNATIONAL DESIGNATIONS:

<b>ASTM C 955</b>	Standard specification for loadbearing (transverse and axial), steel studs, runners (tracks), and bracing or bridging for screw application of gypsum panel products and metal plaster bases.
<b>ASTM A 1003</b>	Standard specification for steel sheet, carbon, metallic, and non-metallic coated for cold-formed framing members.
<b>ASTM C 645</b>	Standard specification for non-structural steel framing members.
<b>ASTM A 653</b>	Standard specification for steel sheet, zinc-coated (galvanized) or zinc-iron alloy coated (galvannealed) by the hot-dip process.

Products are designed in accordance with American Iron & Steel Institute (AISI) Specification for the Design of Cold-Formed Steel Structural Members, latest addition and addenda.
