5. INSTALLATION

PIPE PENETRATION SEALING:

- Install Drago Wrap around pipe by slitting/cutting material.
- If void space is minimal, seal around the base of the pipe using either Drago Tape, DragoSeal™ Tape, Drago® Mastic, or Drago® Sealant and Drago® Sealant Form.

DETAIL PATCH FOR PIPE PENETRATION SEALING:

- Cut a piece of Drago Wrap that creates a 6 inch overlap around all edges of the void space.
- Cut an "X" slightly smaller than the size of the pipe diameter in the center of the detail patch.
- Slide detail patch over pipe, secure tightly.
- Tape down all sides of detail patch with DragoSeal Tape.
- Seal around the base of the pipe using either Drago Tape, DragoSeal Tape, Drago Mastic, or Drago Sealant and Drago Sealant Form.

Drago Tape should be installed above 40°F. In temperatures below 40°F, take extra care to remove moisture or frost from the area of adhesion. Ensure that the installed section is taped with applied pressure to allow for maximum and continuous adhesion of the pressure-sensitive Drago Tape.

Review Drago Wrap's complete installation instructions prior to installation.
