3. PRODUCT DESCRIPTION

USES: Pango Term Bar is a semi-flexible plastic termination bar used for mechanically securing Pango® Wrap to concrete and masonry constructions and against Pango® Bond.

COMPOSITION: Pango Term Bar is made from post-industrial recycled PVC.

SIZE: 42" x 1.125"

FEATURES AND BENEFITS: Pango Term Bar ships 50 term bars in a case | Offers a pocket/lip to accommodate a bead of Pango Bond | Pre-drilled holes approximately every 6" facilitate easy installation | Recycled PVC | Made in the USA

4. TECHNICAL DATA

TABLE 4.1: PHYSICAL PROPERTIES OF PANGO TERM BAR

PROPERTY	RESULTS
Dimensions	42" x 1.125"
Color	Grey
Material	Recycled PVC
Weight	4 oz

5. INSTALLATION

UNDER SLAB & CRAWL SPACE: Nail or screw through Pango Term Bar, Pango Wrap, and Pango Bond to secure to the adjacent foundation construction (e.g. masonry wall). If the beveled edge is facing the wall, a pocket/lip is created where additional Pango Bond can be applied as needed to create a consistent, continuous seal between the wrap and the foundation construction. Pre-drilled holes are provided every 6" for ease of installation.

To cut Pango Term Bar, score with a utility knife or wire snips. Pango Term Bar can be bent back and forth and then broken at desired locations as well.

Pango Term Bar is flexible enough to bend around corners and contours in the wall for easy installation.

For additional information, please refer to Pango's complete installation instructions.
