

EZ-Firestop® Grommet

EZ-Firestop® Grommets make sealing penetrations of individual or small bundles of cables through fire-rated gypsum board walls a snap. Molded from a premium polymer having a UL 94V-0 flammability rating with a soft foam inner core, EZ-Firestop® Grommets are plenum-tested and eliminate the need for conventional firestop products.

Features & Benefits

- Great for single membrane or complete through-penetrations
- For single or multiple cables
- Ideal for Alarm, Security or Wireless Access Point installations
- Designed for 1 & 2 Hr Fire-Rated Gypsum Board Wall assemblies
- Professional finished appearance
