

# the logical choice.

## **EZ** Path The Smart Choice.

EZ-Path® saves time, money, and resources by removing ongoing downstream costs.

**Only EZ-Path**<sup>®</sup> helps you avoid citations and costs associated with non-compliance. Other sleeves require constant upkeep, ongoing maintenance, and inspection to ensure compliance.

You can never be certain that other sleeves have been activated, plugs and putty have been replaced, or that they have been properly sealed to meet codes. And now that The Joint Commission mandates 60 DAY RFIs (Requirements for Improvement) for survey deficiencies— ongoing code compliance is more important than ever.

Were found to be out of compliance except for EZ-Path.

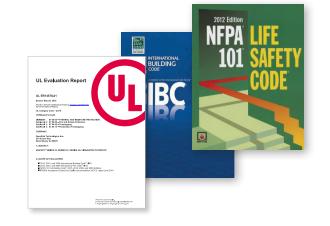

Global Fire Protection
Inspections Department

The Only Maintenance-Free Pathway.

## Annual inspection and maintenance of firestop systems is required by code.

An Evaluation Service Report (ESR)\* was issued on May 20, 2016 by UL® for EZ-Path® Fire-Rated Pathways confirming code compliance with the International Building Code® (IBC), International Fire Code® (IFC), and NFPA 101, "Life Safety Code®" (LSC). The report goes on to confirm that, when properly installed—EZ-Path® Pathways are exempt from ongoing maintenance.

Unlike other sleeves, **EZ-Path®** has no moving parts and requires no action to activate the internal sealing mechanism—making it the *only* rated firestop device that is compliant right out of the box.

**EZ-Path® Fire-Rated Pathways do not require regular maintenance...** 

Evaluation Service Report
Underwriters Laboratory

#### The Only Pathway that Pays for Itself.

Other sleeves incur enormous ongoing costs over the lifecycle of the building.

**EZ-Path**® offers the ultimate in flexibility and can virtually eliminate fines due to non-compliance, increasing your savings over and over again. **EZ-Path**® is a fully sustainable cable pathway solution for the lifetime of your building.

- ► Ends downstream maintenance & inspection costs
- ► Eliminates ongoing fire & smoke sealing costs
- ► Allows remote cable pulls through multiple barriers
- ▶ Reduces unnecessary trips above the ceiling
- Limits liability & decreases exposure to pathogens

Over its lifecycle, EZ-Path\* pays for itself many times over. ""

Jeff Combs

Fire Marshal, Major U.S. Medical System

#### The Logical Solution for You.

#### For Contractors and Maintenance Professionals.

Concerns about failing inspections become a thing of the past with **EZ-Path.** The system is easy to visually inspect and is ideal for both new construction and existing conditions.

#### For the Health Care Professional.

Infection control is paramount in healthcare facilities. **EZ-Path®** minimizes the spread of hospital-acquired infections (HAIs) by reducing or eliminating trips above the ceiling to unseal, reseal, or adjust equipment of any kind.

#### For the Owner.

**EZ-Path**® eliminates downstream labor costs with the use of pull strings inside the **EZ-Path**® devices, for easy cable MAC work from remote locations—saving you time and money over the life cycle of the building.

#### For Architects, Consultants, Specifiers, and RCDDs.

**EZ-Path®** provides you with a complete solution to help protect the legacy of your project. Whether it's the engineered aesthetics, the robust design, the dynamic features, the ability to "future-proof" the design, or the unparalleled performance— **EZ-Path®** has you covered.

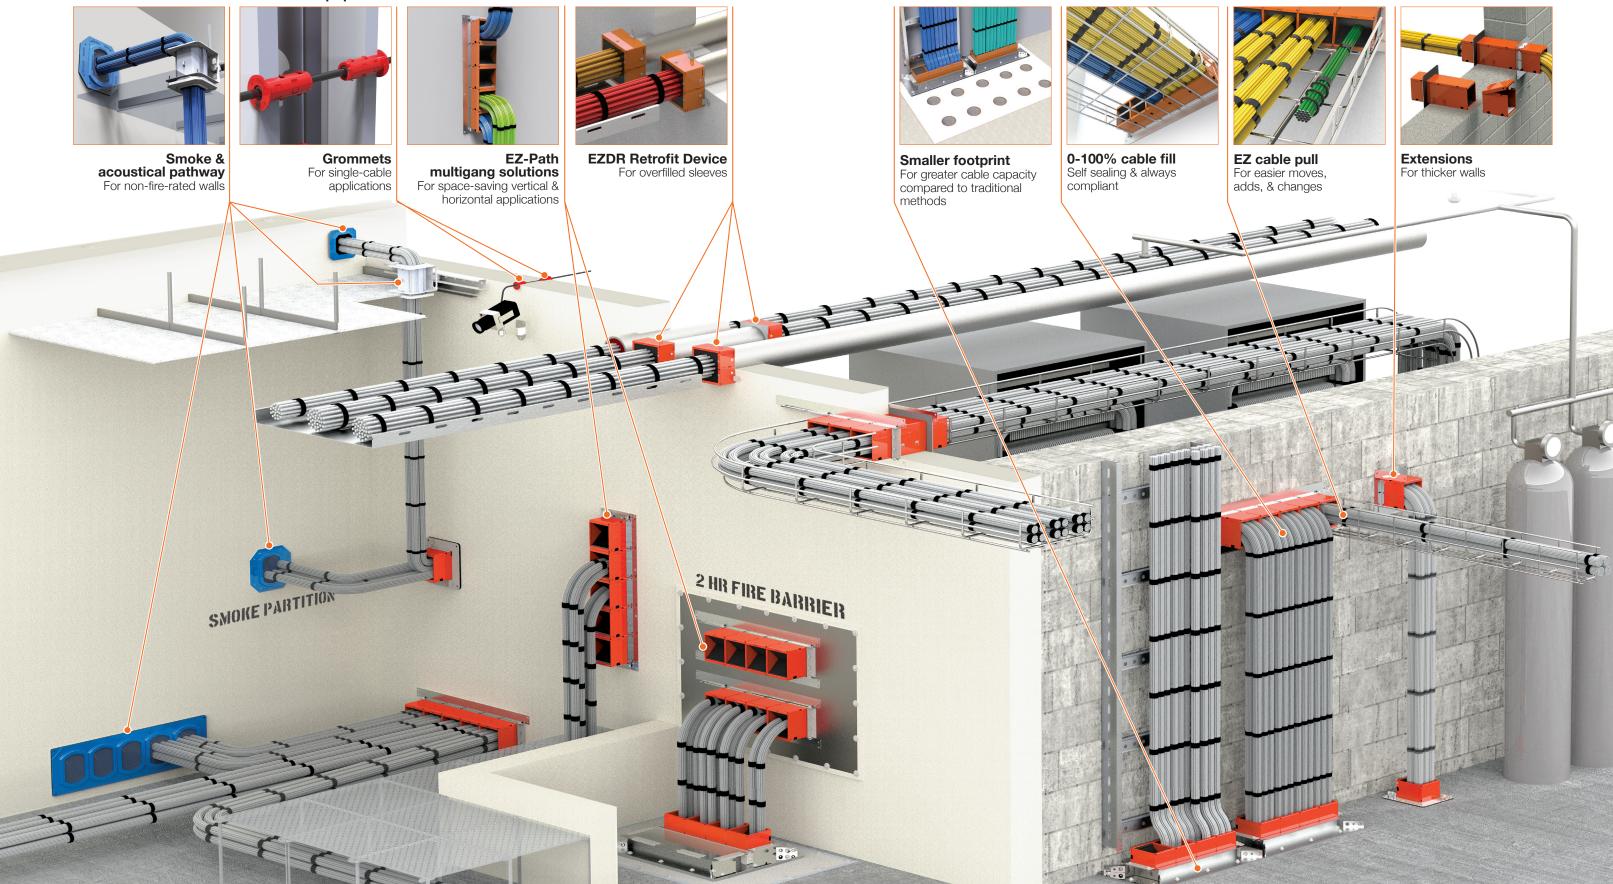

#### For the Cable Installer and IT / ICT Professional.

Recognized as best practice by trade professionals, **EZ-Path®** protects your network. Maintain compliance while navigating the demands of perpetually evolving floor, wall, and ceiling penetrations that result from equipment expansions and technology upgrades. Easy to install with nothing to maintain, **EZ-Path®** lets you execute continuous cable pulls while allowing your network to run at peak performance.

#### Series 44+ Fire-Rated Pathway

The EZ-Path® Series 44+ Fire-Rated Pathway is a maintenance-free pathway solution designed for high cable volume conditions through fire-rated walls and floors. The Series 44+ incorporates self-sealing intumescent pads that automatically adjust to the installed cable fill without the need for user manipulation. Under fire exposure, the intumescent pads expand and swell, resisting the passage of smoke and flame.

#### **Modular Floor Grid System**

Modular Floor Grid Systems utilize the high volume, EZ-Path® Series 44+ pathways, installed in banks of four, to provide your cabling systems with room to grow. Sturdy steel grids mount one, two, or four banks of pathways in built-in slots for a total of up to sixteen pathways through a single floor opening. A single bank floor grid comes complete with pathways. Multibank modular floor grids are installed with firestop panels sealing each slot. As additional cable capacity is required, firestop panels are removed, and pathway modules containing four pathways are installed in each slot.

## Series 33 Fire-Rated Pathway

The EZ-Path® Series 33 Fire-Rated Pathway is a maintenance-free pathway solution for moderate cable volumes through fire-rated walls and floors. The Series 33 incorporates built-in intumescent pads that automatically adjust to cable fills. When exposed to flame and high temperatures, the intumescent pads expand to form a dense insulative char that prevents the passage of smoke and flame.

#### **Features & Benefits:**

- Self Sealing design provides exceptional fire and smoke leakage ratings
- · Allows for easy moves, adds, and changes
- Designed for new and existing conditions
- · Variety of accessories available for any field condition
- Available in an array of colors for easy cable pathway management

#### Series 22 Fire-Rated Pathway

The EZ-Path® Series 22 Fire-Rated Pathway is a maintenance-free pathway solution for smaller cable bundles through fire-rated wall assemblies. The device is offered as a complete kit without the need for additional accessory products for installation.

#### **Features & Benefits:**

- Self Sealing design provides exceptional fire and smoke leakage ratings
- Allows for easy moves, adds, and changes
- Designed for new and existing conditions
- Suited for round and rectangular openings

#### Retrofit Device

Overfilled cable sleeves are the bane of every facilities team. Bring these deficient openings back into code compliance with the **EZ-Path® Retrofit Device**. Its two-part clam shell design installs around projecting sleeves and cable bundles, restoring fire and smoke leakage performance. The EZ-Path® Retrofit Device quickly and easily retrofits sleeves of up to 100% visual fill, restoring fire performance without

the need for additional firestop products.

#### **Features & Benefits:**

- Sized for 2 in. and 4 in. metallic sleeves
- Designed for cable sleeves and stubs
- · Professional fit and finish
- · Safety Orange for easy identification
- · Suited for round and rectangular openings

## EZ-Firestop® Grommet

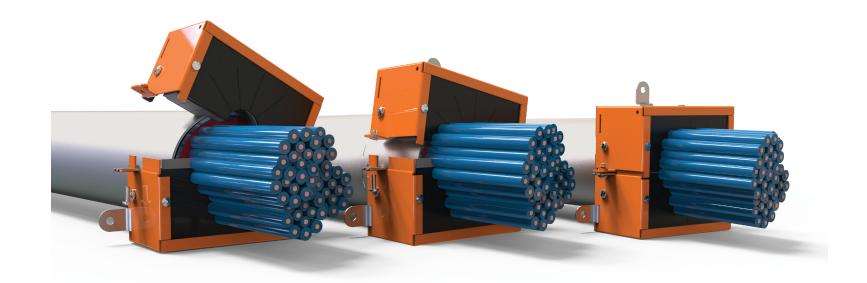

EZ-Firestop® Grommets make sealing penetrations of individual and small bundles of cables through gypsum board walls a snap. Molded from premium plenum-plastics and incorporating a soft foam inner core, EZ-Firestop® Grommets eliminate the need for sleeves, firestop putties, and sealants.

#### Features & Benefits:

- Suited for addressing single membrane or complete through-penetrations
- · Available as a single cable or multiple cable solution
- · Ideal for alarm, security, or wireless access point installations
- Designed for 1 & 2 hr fire-rated gypsum board wall assemblies
- Professional finished appearance
