

EZ Path® Series 22 Fire-Rated Pathway

The EZ Path® Series 22 Fire-Rated Pathway is a maintenance-free fire-rated pathway solution for smaller cable bundles passing through fire-rated wall assemblies. The Series 22 incorporates self-sealing intumescent pads that adjust automatically as cables are added or removed, eliminating the need for manual adjustment or closing. The device is offered as an out of the box solution with all the components and parts needed for installation.

Features & Benefits

- Self-sealing design, no manual closure or sealing requirement
- No sealant or putty - easy moves, adds, and changes
- Provides exceptional fire and smoke leakage ratings
- Tested for cable fills from 0 up to 100%
- Tested in round and rectangular openings
