and unprotected personnel from entering the spill area.

**Environmental precautions:** 

Avoid runoff into storm sewers, ditches, and waterways. Environmental Precautions:

## $\underline{\text{Methods and materials for containment and cleaning up:}}$

Methods for containment: Contain spills with an inert absorbent material such as soil, sand or oil dry.

Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Methods for cleanup: Provide ventilation. Clean up spills immediately observing precautions in the protective equipment

section.

## SECTION 7: HANDLING and STORAGE

Sto Overhead Mortar CI 80702 Revision: 9/2/2020 Page 2 of 6 Precautions for safe handling:

Use with adequate ventilation. Avoid breathing vapor and contact with eyes, skin and clothing. Handling:

Hygiene Practices: Wash thoroughly after handling. Avoid contact with eyes and skin. Avoid inhaling vapor or mist.

Special Handling Procedures: Material is alkaline when mixed with water. Use precaution and proper protective equipment

Conditions for safe storage, including any incompatibilities:

Storage: Store in a cool, dry, well ventilated area away from sources of heat and incompatible materials. Keep

container tightly closed when not in use.

Specific end use(s):

Work Practices: Use good laboratory practice when working with chemicals.

Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety

shower.

Appropriate engineering controls:

**Engineering Controls:** Good general ventilation should be sufficient to control airborne levels. Otherwise, use appropriate

engineering control such as process enclosures, local exhaust ventilation, or other engineering controls including use of a biosafety cabinet / fume hood to control airborne levels below recommended

exposure limits.

Individual protection measures:

Wear appropriate protective glasses or splash goggles as described by 29 CFR 1910.133, OSHA eye and face protection regulation, or the European standard EN 166. Eye/Face Protection:

Skin Protection Description: Protective laboratory coat, apron, or disposable garment recommended.

Hand Protection Description: Use impervious gloves. Nitrile gloves are recommended.

A NIOSH approved air-purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed Respiratory Protection:

exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

Follow good industrial hygiene practices when handling this material.

General Hygiene Considerations: Wash thoroughly after handling. Avoid contact with eyes and skin. Avoid inhaling vapor or mist.
