PROTECT

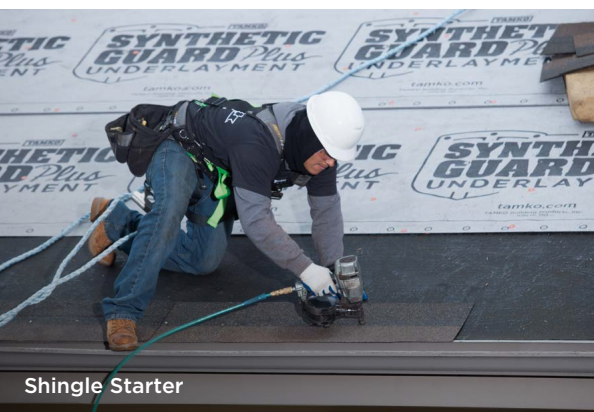

Waterproofing, Underlayments and Starter Shingles

Give your roof a great foundation with the right waterproofing products and application considering your local and state building codes, regional weather, and choice of shingle. Add another layer of protection with synthetic underlayments to help defend the roof deck and create the optimal base for the shingles. Finally, give your shingles the start they need and help reduce blowoffs with TAMKO[®] Starter Course Shingles, a **requirement** for all TAMKO high wind warranties.*

WATERPROOFING

TAMKO's offerings of self-adhering underlayments are the latest in underlayment technology. Manufactured with SBS modified bitumen asphalt, these products are designed for fast and easy application with waterproofing capabilities.

- TW Seam Tape
- TW Underlayment
- TW Metal & Tile Underlayment
- Moisture Guard[®] Underlayment

UNDERLAYMENTS

TAMKO's offerings of synthetic underlayments are constructed of plastic fibers, spun-bonded to a non-woven mat to provide lighter weight, tear resistant qualities and serve as the base layer over the entire roof deck before shingles are installed.

- Synthetic Guard[™] Underlayment
- Synthetic Guard[™] Plus Underlayment

STARTER

Start your shingle installation off well with TAMKO[®] Starter Course Shingles on the eave and/or rake edge prior to shingle installation, an important part of any roofing system and a **requirement** for all TAMKO high wind warranties.

- TAMKO[®] Shingle Starter
- TAMKO[®] Perforated Starter
- TAMKO[®] 10-inch Starter

* Please consult TAMKO's Limited Warranty and Application Instructions for any requirements or limitations.

Ventilation and Hip & Ridge Shingles

Finish your job off right with crucial roof ventilation that can help prolong the life of your roof, while capping it all off with hip and ridge shingles to protect vulnerable ridges and provide a beautiful, finished look for the entire project.

HIP & RIDGE

Top your roof project off with the beautiful finish of TAMKO® Hip & Ridge Shingles. Offered in a wide variety of color offerings to complement the full TAMKO® asphalt shingle collection. Hip & Ridge shingles form a cap along various angles of the roof to help enhance both the beauty and protection of the finished roof.

- TAMKO® 12-1/4×12 Hip & Ridge
- TAMKO® Proline® 12-1/4×12 Hip & Ridge
- Heritage® Designer Ridge

VENTILATION

Inadequate ventilation is a major cause of a variety of roof problems, including premature shingle aging. Give your roof the breathable finish it needs with a selection of either sectional or rolled ridge vents designed to help properly ventilate your roof to prolong performance.
