

CUSTOM FABRICATION

Prioritizing quality, speed and cost

Solmax custom fabrication is in the business of solving problems. We listen, ask questions, find answers and generate results, delivering custom-fit prefabricated polyethylene liners and components that meet your exact specifications.

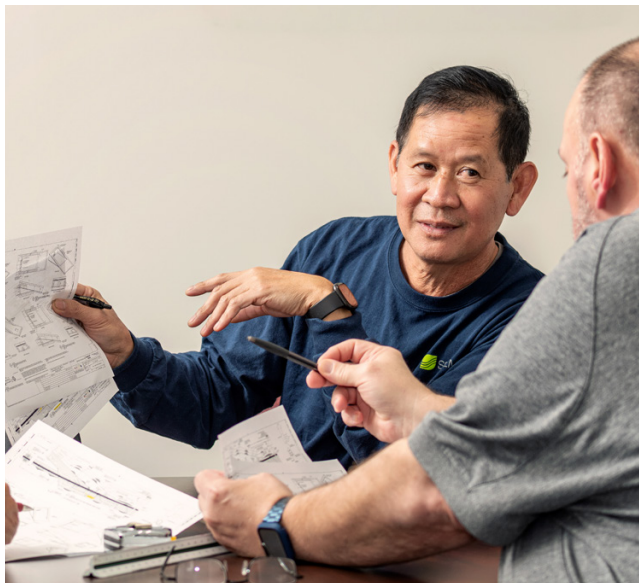

Our skilled and experienced staff prioritize quality, speed, and cost. We use the latest technologies in our well-equipped facility in Houston, TX to manufacture solutions that perform well in virtually any environment, and comply with industry and regulatory requirements.

Our custom liners and fabrication products have been used around the world in a number of applications, from landfill and equipment covers to grain storage, aggregate piles, tank trucks, frack tanks, loading areas, landscaping, decontamination pads, wastewater facilities, aquaculture, and chemical and spill containment.

Custom-fit prefabricated liner and product solutions

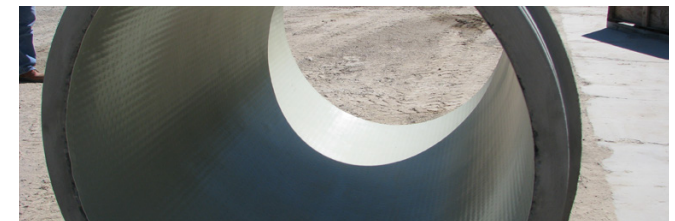

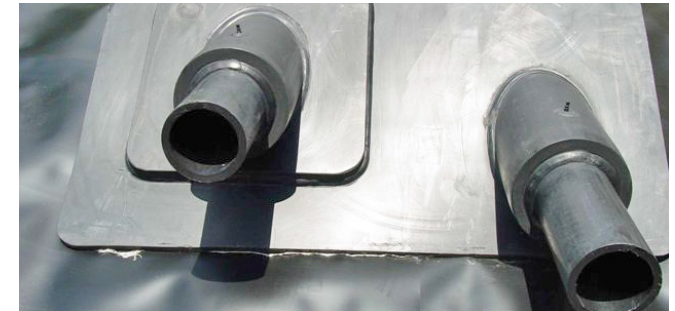

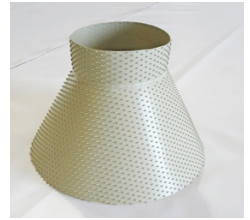

- Cut-to-fit liners for concrete protection, water storage tanks and bags
- Quick Cover temporary and daily landfill covers
- Temporary and permanent decontamination applications
- Thermo-formed corners for quicker installation in difficult areas
- Vacuum-formed floats and blocks for floating covers and concrete piers
- Collection and sampling sumps
- Pipe boots and bootless pipe penetrations (vacuum formed and hand-welded)
- Sand tubes for additional ballast on liners and floating covers
- Vertical barriers for underground containment
- Portable secondary containment
- A concrete-protective embedment liner (**GSE® Studliner®**)
- Ladders for installation along slopes of reservoirs
- Water-level depth indicators
- Custom-sized lining pads

Benefits of working with Solmax

- Custom fabrication
- Skilled craftsmen, experienced staff
- Well-equipped, 12,000 ft² (1,100m²) manufacturing facility
- Our large inventory of material, and fabrication capabilities provides short lead times
- High facility safety rating

About Solmax

Solmax is a world leader in sustainable construction solutions, for civil and environmental infrastructure. Its pioneering products separate, contain, filter, drain and reinforce essential applications in a more sustainable way – making the world a better place. The company was founded in 1981, and has grown through the acquisition of GSE, TenCate Geosynthetics and Propex. It is now the largest geosynthetics company in the world, empowered by more than 2,000 talented people. Solmax is headquartered in the province of Quebec, Canada, with subsidiaries and operations across the globe.

Uncompromised quality

Our products are manufactured to strict international quality standards. All our products are tested and verified at our dedicated and comprehensive laboratories which maintain numerous accreditations. We offer our partners a wide scope of testing according to published standards to ensure products delivered to sites meet specified quality requirements.

Let's build infrastructure better

Solmax is not a design or engineering professional and has not performed any such design services to determine if Solmax's goods comply with any project plans or specifications, or with the application or use of Solmax's goods to any particular system, project, purpose, installation, or specification.
