Thermafiber Technical Bulletin

Recycled Content for Thermafiber Bonded Products

The EPA Preference Program for building insulation has recommended the level of recovered materials (recycled) content for rock wool insulation be 75%. Thermafiber products are available with recycled contents from 70% to 90%. These percentage recycle contents are based on pre-consumer (post-industrial) content with 0% post-consumer content. See actual post-industrial recycled contents listed below:

Recycled Content:

Pre-consumer recycled content:

Special "Green" Fiber.....	90%
Dark Fiber Mineral Wool Products.....	84%
EPA Choice Fiber (US Government Buildings).....	75%
Regular Mineral Wool Products.....	70%
<u>Post-consumer recycled content.....</u>	<u>0%</u>
