

CONSTRUCTION ACCESSORIES

STUCCO MESH

This welded, galvanized 2" x 2" mesh is ideal for all interior and exterior stucco, masonry and plaster applications. Easy to handle, Tree Island stucco mesh rolls out flat and stays flat, providing a positive bonding surface.

Produced from 16 gauge wire with 1/4" self-furring crimps, the product is easy to work with and galvanized for excellent rust resistance. 50 square yards standard rolls (450 ft².) are available in 48" or 54" widths.

Meets applicable requirements of ASTM C933.

BUILDING FABRIC

Easier to use than rebar, building fabric provides effective concrete reinforcement for heavy-duty projects including driveways, walkways, floors, water tanks and pools. Simply lay down the fabric and you're ready to pour concrete.

Welded wire fabric is available in 4 to 10 gauge and is produced in a variety of sizes of rolls and sheets. Fabric spacing available in 4" x 4", 6" x 6", 12" x 12" spacing.

Meets requirements of ASTM A82 and A185.
