

TECHNICAL DATA SHEET

TREMCO® BG GRIP TAPE

Butyl-hybrid, Fleece backed Seaming Tape

PRODUCT DESCRIPTION

TREMCO® BG Grip tape is a butyl-hybrid adhesive tape with a fleece facer. A release liner protects the adhesive backing until removed during installation. TREMCO BG Grip tape can be applied in temperatures from 0° F (-17° C) to 170° F (76° C).

BASIC USES

TREMCO BG Grip Tape is used to seal TREMproof™ Amphibia™ sheet waterproofing membrane seam overlaps during installation, allowing for the continuous adhesion of the membrane to the concrete. The TREMCO BG Grip Tape prevents membrane laps from separating during installation and construction procedures. The tape bonds strongly to the TREMproof Amphibia membrane sealing overlaps and creating a watertight bond.

FEATURES & BENEFITS

- Conformable fleece backing coated with butyl-hybrid adhesive seals and prevents water intrusion.
- Fleece backing bonds mechanically with concrete and shotcrete.
- Adhesive has low and high temperature flexibility and adhesion.
- Bonds to a wide variety of common substrates such as EPDM, SBS, TPO, metal and wood.
