**Individual protection measures, such as personal protective equipment**

- General information:**                      Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Supplementary local exhaust ventilation, closed systems, or respiratory and eye protection may be needed in special circumstances, such as poorly ventilated spaces, heating, evaporation of liquids from large surfaces, spraying of mists, mechanical generation of dusts, drying of solids, etc.
- Eye/face protection:**                      Wear safety glasses with side shields (or goggles).
- Skin Protection**
- Hand Protection:**                      Use suitable protective gloves if risk of skin contact.
- Other:**                                      Wear suitable protective clothing.
- Respiratory Protection:**                      In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor.
