

We certify that TREMstop Fyre-Sil Sealant and Fyre-Sil SL Sealant has been tested against ASTM E-814, **Standard Test Method for Fire Tests of Through Penetration Fire Stops** and **UL 2079 Fire-Tests for Fire Resistance of Building Joint Systems** and does conform to the specification requirements.

Although Fyre-Sil and Fyre-Sil SL is not NSF registered, or previously authorized by USDA, it does meet the requirements for use in Federally inspected food processing facilities provided it is not used in areas where food is being processed, prepared or packaged. The material must also be applied in a manner which prevents any direct or indirect contamination of food. Additionally, before any food product can be placed in the area of treatment, the sealant must be allowed to cure according to manufacturer's recommendations and the area should be sufficiently free of odor to prevent food contamination.
