

TREMPRO® 626

General Purpose Textured Polyurethane Sealant

Product Overview

TREMPRO® 626 provides the finished look of a welded joint. It is designed for use in many applications, including lap joints and cove beads on semi-truck trailers, shipping containers, RV trailers, and rail cars. TREMPRO 626, with its unique texture, has been used as a perimeter sealant around window and door installations where texture complements the stucco exterior or brick-and-mortar façade.

The product has excellent adhesion to most substrates without the use of a primer. Once cured, the product exhibits tenacious adhesion and has the ability to be subjected to stress and vibration as well as expansion and contraction within a joint.

Features & Benefits

- Ideal for exterior applications, textured joints, and welded joint finishes
- Easy to apply with conventional caulking equipment
- Superior sealant designed for a variety of uses, such as log home chinking, butt joints for pre-engineered metal buildings and applications that require continuous immersion in water

Packaging

10.1 oz (300-mL) cartridges
