

EXPANSION JOINTS & TRANSITION SEALANTS

Pre-Compressed, Acrylic-Impregnated Foams
Preformed Extrusions | Closed-Cell Foams
Traffic-Rated Protector Plates

EXPANSION JOINT SYSTEMS

Willseal's best-in-class pre-compressed and acrylic-impregnated foam products for horizontal and vertical joint applications.

Tremco's industry-leading joint sealants, polyurethane-methacrylate technology, pre-formed extrusions and gun-grade foams.

For over 110 combined years, our products have been continuously specified and installed on thousands of new construction

and restoration projects worldwide, and have always stood for the highest quality sealants.

Willseal and Tremco products are designed for maximum waterproofing, thermal, sound, and air-tightness to meet global passive housing standards — and feature superior durability, excellent movement capabilities, and streamlined installation.

MARKETS SERVED:

- Commercial construction
- Industrial / manufacturing
- Prefabricated / modular
- Educational and institutional
- Infrastructure and DOT
- Residential construction
- Stadiums and arenas
- Parking facilities
- Medical facilities
- Fire protection

JOINT APPLICATIONS:

- Traffic-grade horizontal joints
- Primary vertical joints
- Curtain walls, windows and flashing
- Control, longitudinal and transverse joints
- Dryvit® and exterior panel system joints
- Pre-cast concrete and built-up walls
- Fire-rated joints
- Seismic, large and retrofit joints
- Below-grade applications

COLOR OPTIONS

Many of our joint sealant solutions are available finished in any standard Spectrem® color — in addition to a broad range of industry standard colors. For even greater customization, we can custom-match most colors to blend in perfectly with your project.

(Products with this icon indicate color options are available.)

SPECTREM® STANDARD COLORS

				
WHITE	PRECAST WHITE	IVORY	SANDSTONE	BUFF
				
OFF WHITE	LIMESTONE	ANODIZED ALUMINUM	GREY	ALUMINUM STONE
				
LIGHT BRONZE	CHAMPAGNE	ADOBE TAN	RUSTIC BRICK	CHARCOAL
				
BRONZE	DARK BRONZE	BLACK		

TRAFFIC-RATED SPECTREM® COLORS

		
TRAFFIC-GRADE BLACK	HIGHWAY GREY	CONCRETE GREY

All colors shown are approximate and may not reflect sheen or shade precisely, as varying amounts of aggregate will alter light-reflecting properties. Tremco always recommends a test patch to gain final color approval. Different lighting conditions can influence color appearance: for truer color please view in daylight. Some colors may require a minimum quantity. Custom colors are available upon request. Contact Tremco Customer Service for more information.

EXPANSION JOINT PRODUCTS

With a wide variety of pre-compressed, acrylic-impregnated foams, pre-formed extrusions, and gun-grade foams, Willseal and Tremco have the ideal solution for any expansion joint or transition sealant project.

Whether you require traffic-grade horizontal, color-matched vertical, 1, 2, or 3 hour fire-rated, seismic capabilities, waterproof, sound

attenuating, dust-proof or airtight seals, you'll find a variety of options in the following pages.

All products feature unmatched quality and durability, excellent movement capabilities, and innovative, streamlined installations designed to help create safer, greener, high-performance structures.

WILLSEAL® 150

Willseal® 150 is a pre-compressed, self-expanding foam joint seal, engineered to perform as a highly flexible, weathertight, primary seal in vertical exterior applications. The high-density polyurethane foam self-expands to fill the joint creating a permanent, elastic, vapor-permeable, weathertight seal.

FEATURES & BENEFITS:

- ✓ Depth of foam can be changed to increase R-value and sound properties
- ✓ Protects against driving rain up to 12 lb/ft² or 600 Pa
- ✓ UV-stable and remains permanently flexible for lifetime of seal
- ✓ Available in both sticks and rolls that are treated with a pressure-sensitive adhesive (PSA) on one side for ease of installation

COMMON APPLICATIONS:

- ✓ Primary expansion and control joints
- ✓ Joints in pre-cast concrete, masonry, brick and facades
- ✓ Interior vapor, dust and air control
- ✓ Starter track assemblies for window walls
- ✓ Exterior Insulation and Finish Systems (EIFS)

WILLSEAL® 250

Willseal® 250 is a pre-compressed, self-expanding foam joint sealant with a traffic grade silicone coating engineered to perform in horizontal applications subject to solvents and fuels such as those found in parking garages, road and bridge joints, and airport runways. Willseal 250 is specifically designed to provide a maximum seal in structures with shear and rapid movement.

FEATURES & BENEFITS:

- ✓ Allows for up to +/- 50% movement from mean joint size
- ✓ UV stable primary seal
- ✓ Advanced acrylic impregnation without heavy fillers
- ✓ True tensionless system

COMMON APPLICATIONS:

- ✓ Primary horizontal expansion joints with vehicular traffic and/or pedestrian traffic
- ✓ Parking garages, stadiums, airport taxiways and runways
- ✓ Plaza decks on grade

WILLSEAL® 250-B

Willseal® 250-B is a pre-compressed, self-expanding foam joint sealant with a highway-grade silicone coating engineered to perform in primary horizontal applications such as road and bridge joints. The pre-compressed foam core is saturated with a hydrophobic acrylic emulsion and coated with a fuel-resistant silicone sealant, allowing it to provide an optimal primary seal that is waterproof to rain and snow at the surface level.

FEATURES & BENEFITS:

- ✓ Allows for up to +/- 60% movement
- ✓ Specifically designed for rapid cycling and thermal shock
- ✓ Permanently conforms to varying joint contours
- ✓ Suitable for exposure to common automotive oils/fuels and jet fuel (per FHA PL06)

COMMON APPLICATIONS:

- ✓ Primary horizontal expansion joints with vehicular traffic
- ✓ Road and bridge joints
- ✓ Approach slabs

WILLSEAL® 250-R

Willseal® 250-R is a patent-protected expansion joint system which combines the performance and reliability of Willseal 250-R with reinforcing members positioned beneath the sealant face to support higher point loads. It is typically used as a joint sealant for both interior and exterior high foot traffic areas, engineered to perform in horizontal applications. Current patents: No. 9739049, No. 9951515

FEATURES & BENEFITS:

- ✓ Allows for up to +/- 50% movement
- ✓ Ideally suited to handle heavy pedestrian traffic
- ✓ Accommodates rapid rate of movement
- ✓ Surface load transfer

COMMON APPLICATIONS:

- ✓ Primary horizontal expansion joints with vehicular and/or pedestrian traffic
- ✓ Parking garages, stadiums, airport taxiways and runways
- ✓ Plaza decks on grade

WILLSEAL® 600

Willseal® 600 is a pre-compressed, self-expanding foam joint sealant, engineered to perform as a highly flexible, weathertight, primary seal in vertical exterior applications. Willseal 600 can also provide the ideal foundation for a large variety of wet sealants, such as silicone, polyurethane, polysulfide, and acrylic if desired. Allows for up to +/- 50% movement.

FEATURES & BENEFITS:

- ✓ Never under tension or cohesion strain
- ✓ Minimal surface prep and no priming required
- ✓ Vapor-permeable, and seals gaps as small as 1/8"
- ✓ Thermal resistance (R-value)

COMMON APPLICATIONS:

- ✓ Primary expansion, control, isolation and retrofit joints
- ✓ Exterior panel systems - metal, masonry, stone, EIFS (Dryvit), curtain walls
- ✓ Pre-cast concrete walls, tilt-up walls
- ✓ Window and flashing applications
- ✓ Interior vapor, dust, acoustical and air control

WILLSEAL BACKER ROLL®

Willseal Backer Roll® is a pre-compressed, self-expanding foam joint sealant, engineered to perform as a highly flexible secondary seal in vertical exterior applications. Willseal Backer Roll provides the ideal foundation for a large variety of wet sealants, such as silicone, polyurethane, polysulfide, and acrylic.

FEATURES & BENEFITS:

- ✓ Allows for up to +/- 50% movement
- ✓ Never under tension or cohesion strain
- ✓ Minimal surface prep and no priming required

COMMON APPLICATIONS:

- ✓ Secondary construction joints - for use behind wet-applied sealants
- ✓ Exterior panel systems - masonry, stone, EIFS (Dryvit), curtain walls
- ✓ Pre-cast concrete walls, tilt-up walls
- ✓ Window and flashing applications
- ✓ Interior vapor, dust, acoustical and air control

WILLSEAL® CORESEAL

Willseal® Coreseal is a preformed, compressible system that is impermeable to water and provides a watertight seal. It meets all applicable standards for compressible sealants and performs under extreme conditions including bridge and parking structure expansion joints. It provides a watertight, dust-proof, airtight, UV stable, chemically resistant, soundproof, and insulated seal.

FEATURES & BENEFITS:

- ✓ Unique profile for easier install and less tension
- ✓ Creates a watertight, dust-proof, noise reducing, thermally insulating primary seal
- ✓ Able to be heat spliced
- ✓ Customizable to suit unique application needs

COMMON APPLICATIONS:

- ✓ Primary horizontal and vertical joints
- ✓ Highway longitudinal and transverse joints
- ✓ Parking structure expansion joints
- ✓ Below grade connections

WILLSEAL® COLOR CORESEAL V

Willseal® Color Coreseal V is a lightweight, closed-cell vinyl acetate (EVA) copolymer foam with a factory-applied sealant coating designed to provide a watertight, dust-proof, airtight, noise reducing, thermally insulating and UV stable primary seal for vertical applications.

FEATURES & BENEFITS:

- ✓ Accommodates rapid rates of joint movement
- ✓ Monolithic foam will not delaminate like multi-layer products
- ✓ Can be supplied with a factory-applied puncture-resistant sealant coating
- ✓ Suitable for joints up to 10" wide

COMMON APPLICATIONS:

- ✓ Vertical expansion, control and isolation joints
- ✓ Precast concrete walls, tilt-up walls
- ✓ Exterior panel systems (masonry, granite, metal, EIFS and curtain walls)
- ✓ Seismic, large and retrofit joints

WILLSEAL® COLOR CORESEAL H

Willseal® Color Coreseal H is a lightweight, closed-cell vinyl acetate (EVA) copolymer foam with a factory-applied traffic-rated sealant coating designed to provide a watertight, dust-proof, airtight, noise reducing, thermally insulating and UV stable primary seal for horizontal applications.

FEATURES & BENEFITS:

- ✓ Accommodates rapid rates of joint movement
- ✓ Monolithic foam will not delaminate like multi-layer products

COMMON APPLICATIONS:

- ✓ Below grade connections
- ✓ Highway joints
- ✓ Seismic, large and retrofit joints
- ✓ Bridge and parking structure expansion joints

WILLSEAL® FR-V

Willseal® FR-V is a factory controlled, watertight, clean handling, UV stable, sound attenuating, energy efficient and fire rated joint seal with a single, unified installation process. Willseal FR-V provides a 1, 2, or 3-hour fire rated vertical seal.

FEATURES & BENEFITS:

- ✓ Innovative internal smoke barrier prevents fumes from penetrating the joint system
- ✓ Can be supplied with a factory-applied Pick-resistant sealant coating
- ✓ Waterproof silicone faces on fire-retardant impregnated foam
- ✓ No need for additional intumescent bellows
- ✓ Non-invasive anchoring means no drilling or modification to the substrates
- ✓ UL 2079 tested and certified

COMMON APPLICATIONS:

- ✓ Vertical wall installations
- ✓ Behind other expansion joint covers, plates or fillers

WILLSEAL® FR-H

Willseal® FR-H is a factory controlled, watertight, clean handling, UV stable, sound attenuating, energy efficient and fire rated joint seal with a single, unified installation process. Willseal FR-H provides a 1, 2, or 3-hour fire rated seal. Available in a reinforced version for up to and including 3" joints.

FEATURES & BENEFITS:

- ✓ Innovative internal smoke barrier prevents fumes from penetrating the joint system
- ✓ Waterproof silicone faces on fire-retardant impregnated foam
- ✓ No need for additional intumescent bellows
- ✓ Non-invasive anchoring means no drilling or modification to the substrates
- ✓ UL 2079 tested and certified

COMMON APPLICATIONS:

- ✓ Horizontal expansion joints
- ✓ Behind other expansion joint covers, plates or fillers

WILLSEAL® SEISMIC

Willseal® Seismic is a one-step primary sealant for exposed areas where color matching is important. It has an elastomeric coating on the exterior surface, which can be factory colored to match most construction substrates or sealants.

FEATURES & BENEFITS:

- ✓ Accommodates rapid rates of joint movement
- ✓ Excellent compression recovery
- ✓ Permanently elastic and weathertight
- ✓ Allows for up to +/- 50% movement

COMMON APPLICATIONS:

- ✓ Primary vertical construction joints
- ✓ Expansion, control and isolation joints
- ✓ Retrofit and seismic joints
- ✓ Pre-cast concrete walls, tilt-up walls
- ✓ Exterior panel systems - masonry, granite, metal, EIFS (Dryvit), curtain walls

WILLSEAL® SEISMIC HS

Willseal® Seismic HS is a pre-compressed, self-expanding foam joint seal with a factory-applied, silicone sealant face. It is designed to provide a watertight, dust proof, noise reducing, thermally insulating, UV stable primary seal in horizontal applications.

FEATURES & BENEFITS:

- ✓ Open-cell foam impregnated with a hydrophobic, acrylic polymer and coated with a factory-applied silicone sealant creates a watertight seal
- ✓ Accommodates +/-50% movement at rapid rates
- ✓ Utilizes non-invasive anchoring, leaves no unbonded laminations
- ✓ Available factory-coated with silicone sealant in standard or custom colors to match the desired appearance

COMMON APPLICATIONS:

- ✓ Primary construction joints
- ✓ Retrofit joints
- ✓ Seismic joints
- ✓ Exterior panel systems
- ✓ Joints for pre-cast concrete floor to wall joints

WILLSEAL® PF100

Willseal® PF100 is a pre-compressed, self-expanding foam joint seal, engineered to perform as a weathertight primary seal designed for use in various prefabricated applications. Single step application reduces labor, time, and material (no backer rod or tooling required).

FEATURES & BENEFITS:

- ✓ Incorporated into NFPA 285 assemblies
- ✓ Comprised of Low-Emitting Materials - Adhesives and Sealants (LEED Credit 4.1)
- ✓ Meets or exceeds the requirements of IBC testing for air barriers, 2 hours at 300pa (ASTM E283). Also meets or exceeds the requirements for ASTM E331, up to 1200pa.
- ✓ Thermal resistance (R-value) and UV stable

COMMON APPLICATIONS:

- ✓ Modular
- ✓ Panelization
- ✓ Tilt up and other off-site construction methods

WILLSEAL® PF200

Willseal® PF200 is a pre-compressed, self-expanding foam joint seal, engineered to perform as a weathertight primary seal designed for use in various prefabricated applications. Available factory coated with a colored sealant face to match any aesthetic need. The product self-expands to fill the joint and is capable of +/- 50% movement from the mean joint size.

FEATURES & BENEFITS:

- ✓ Available in a wide variety of colors
- ✓ No side wall adhesive or finishes are needed
- ✓ Ease of use with minimal surface preparation
- ✓ Thermal resistance (R-value) and UV stable
- ✓ Meets or exceeds the requirements of IBC testing for air barriers

COMMON APPLICATIONS:

- ✓ Modular
- ✓ Panelization
- ✓ Tilt up and other off-site construction methods

WILLSEAL® STC

Willseal® STC is a compressible type expansion joint system for both vertical and horizontal joints on a vertical plane where interior sound control is needed. Willseal STC is excellent at blocking and controlling dust, draft, heat, cold and sound in interior offices, quiet rooms, lobbies, conference rooms.

FEATURES & BENEFITS:

- ✓ 1, 2, 3 or all 4 sides can be coated with colored silicone sealant to match wall coverings and substrates
- ✓ Ease of installation allows for labor savings and high production value
- ✓ No mechanical hardware needed for installation
- ✓ Variety of color options available

COMMON APPLICATIONS:

- ✓ Window to wall, head to wall, curtain wall and partition to wall connections
- ✓ Moveable or permanent partitions
- ✓ Parking garage expansion joints

FACTORY TRANSITIONS

Willseal Patented-Protected Factory Transitions provide a watertight seal that accommodates directional changes that occur in construction. Factory Transitions are offered in Willseal Seismic, 250, Coreseal and Fire-rated products.

FEATURES & BENEFITS:

- ✓ Factory cut and welded
- ✓ Watertight seal
- ✓ Reduce labor and waste
- ✓ Custom sizes and configurations are available

COMMON APPLICATIONS:

- ✓ Floor-to-floor transitions
- ✓ Floor-to-wall transitions
- ✓ Treads and risers

WILLSEAL® WJS

Willseal® WJS is a waterproof expansion joint system that combines an elastoprene rubber seal with Willcrete, an impact absorbing elastomeric concrete, to create a continuous seal with concrete decks. The glands can be supplied in continuous sizes and lengths to assure a continuous seal in any deck-to-deck or deck-to-wall applications.

FEATURES & BENEFITS:

- ✓ Capable of withstanding thermal, seismic, vertical and lateral shear movement
- ✓ Resistant to UV exposure, extreme temperatures, and most chemicals normally present in vehicular structures
- ✓ Provides a long-lasting, continuous watertight anchoring system that is ADA compliant and low profile
- ✓ System is integral with the concrete deck

COMMON APPLICATIONS:

- ✓ Sealing traffic bearing expansion joint openings in parking structures, stadiums, plaza decks and other open-air structures

WILLSEAL PROTECTOR PLATES®

PEDESTRIAN

Designed for applications subjected to heavy pedestrian traffic. This series is surface-mounted, maintains ADA compliance, and features a textured surface.

HINGED

Designed for covering expansion joint openings in high-volume pedestrian and vehicular traffic areas. Available for slab-to-slab and slab-to-wall connections.

FLEX

Designed for covering expansion joint openings in high volume pedestrian and vehicular traffic areas. This series can accommodate vertical offsets in opposing concrete decks and multi-directional seismic movement. Available for slab-to-slab and slab-to-wall connections.

PROGLAZE® ETA

Proglaze® ETA is a pre-engineered translucent silicone transition assembly for junctions between assemblies throughout the building envelope. It is comprised of a flat, ribbed silicone extrusion which is adhered with Spectrem® 1 Silicone Sealant to ensure a durable connection and positive seal.

FEATURES & BENEFITS:

- ✓ Can span and seal across irregular geometries
- ✓ Translucent silicone allows installers to verify a complete seal
- ✓ Variety of sizes available
- ✓ Durable, flexible connection between components

COMMON APPLICATIONS:

- ✓ Roof-to-wall, window-to-wall and foundation-to-wall connections
- ✓ Expansion, drift and control joints
- ✓ Floor deflection joints
- ✓ Corner connections
- ✓ Penetrations

SPECTREM® SIMPLE SEAL

Spectrem® Simple Seal high-performance silicone extrusions are designed to seal joints and gaps ranging from low to high-movement conditions. Spectrem Simple Seal provides flexible, tear-resistant properties that will help to protect your building from air and moisture penetration.

FEATURES & BENEFITS:

- ✓ Easy installation reduces time and labor costs
- ✓ Superior flexibility and +/- movement capabilities
- ✓ High strength provides durability and excellent tear resistance

COMMON APPLICATIONS:

- ✓ Window/door perimeters
- ✓ Dryvit / EIFS joints
- ✓ Parapet walls
- ✓ Skylights
- ✓ Aluminum window seals
- ✓ Transition seals
- ✓ Curtain wall joints
- ✓ Sheet metal roof joints and other lap joints

Construction Products Group

Part of Tremco Construction Products Group

Tremco Construction Products Group (CPG) brings together the Commercial Sealants & Waterproofing and Roofing & Building Maintenance divisions of Tremco CPG Inc.; Dryvit and Willseal brands; Nudura Inc.; Prebuck LLC; Weatherproofing Technologies, Inc.; Weatherproofing Technologies Canada, Inc.; and Pure Air Control Services, Inc.

Products from across the Tremco CPG companies' lines are designed for maximum waterproofing, thermal, sound, and air-tightness, and systems are rigorously tested for performance and compatibility at our one-of-a-kind building science laboratory.

Look to Tremco CPG for:

- ✓ Dryvit and Tremco Flashing and Vapor Barrier Systems
- ✓ Willseal Pre-compressed Foam Expansion Joint Products
- ✓ Tremco Sealants, Adhesives, and Transition Assemblies
- ✓ Nudura Insulated Concreate Foam (ICF) Systems
