\*\*\*\*\* Best Choice for the application.

\* May be used for the application, but other products would be better suited.

Tremco provides a broad selection of products for coating applications. In many cases, there are several products which may be used depending on the demands of the application. The number of \* associated with the product indicates order of preference with \*\*\*\*\* being the Best Choice and \* indicating that it may be used, but better choices are available. No stars means that the product is not recommended for that application. N/A means the product is not applicable for the application type.

**Due to varying on-site conditions, this chart should be used only as a guideline. Please contact your local Tremco Sales Representative for a field assessment and recommendation.**

Note: VOC laws vary from one location to the next. As such, not all Vulkem coating products may be available in all areas. Please consult your local sales representative for a list of products available in your region.
