RE: Tremco® Vulkem® Deckcoating System Top Coats– Energy Star™ Rating and LEED™

To Whom It May Concern:

Tremco, as an organization, is committed to quality, responsive to internal and external customers, our employees, our community and environment, and we will treat all with respect and good stewardship.

The topcoats of our Deck Coating Systems, including Vulkem 351 (LV), Vulkem 351NF, Vulkem 951NF, and Vulkem 346, have been tested *in the white color* and meet Energy Star requirements as high reflectivity, low emissivity coatings. This means they are in fact shown to absorb a minimal amount of light energy as heat and, consequently, reduce HVAC loads for a building as well as the heat island effect.

Additionally, these coatings will aid in obtaining LEED™ credits, particularly Sustainable Sites Credits which address the heat island effect of non-roof and roof areas.

Sincerely,

A handwritten signature in black ink, appearing to be "Michael Schmeida".
