stormwater runoff volume and also retain water for vegetated roofing systems. SS Credit 7.2 – Heat Island Effect

VR HydraPanel components can improve the drainage function and water retention of vegetated roof systems.

Water Efficiency (WE)

WE Credits 1.1 and 1.2 – Water Efficient Landscaping VR HydraPanel components can be integrated into a design strategy to capture rainwater for use in irrigation systems, reducing the need to use potable water.

WE Credit 2 – Innovative Wastewater Technologies VR HydraPanel components can direct appropriate wastewater discharge to cisterns and retainage ponds awaiting use in non-potable plumbing systems and site irrigation.

Materials and Resources (MR)

MR Credits 4.1 and 4.2 – Recycled Content These product components have a very high percentage of pre-consumer recycled content. MR Credits 5.1 and 5.2 – Regional Materials VR HydraPanel and VR Mod components are manufactured in Pickering, ON. Projects within 500 miles of the manufacturing location or the source of purchase from a stocking distributor can take advantage of proximity.
