

PRODUCT DESCRIPTION

Tremco PUMA Initiator+: A reactive catalyst in the form of a white powder used to cure all resins of Vulkem® EWS and TREMproof® PUMA

Tremco PUMA Filler Powder: A non-reactive, white, filler powder used to thicken Tremco PUMA WC.

Tremco PUMA Cleaner: A one-part MMA cleaner for all tools such as mixing paddles, squeegees, spiked rollers and trowels. Always use this cleaner for Tremco PUMA materials. Never use any kind of solvent to clean any of your tools as this will cause contamination and inhibit cure.

Tremco PUMA Polyethylene Fibers: A thickening agent used to enhance viscosity and reinforce Tremco PUMA resins where added structure or body is required.

BASIC USES

Tremco PUMA accessories are designed for use with the Vulkem EWS and TREMproof PUMA systems. Please refer to the appropriate application instructions for proper use.

AVAILABILITY

Immediately available from your local Tremco Sales Representative.
