TREMCO ROOFING'S RESTORATION SYSTEMS SUPPORT SUSTAINABILITY

Restoring roofs has been at the forefront of our philosophy for over 80 years. This positions our reflective roof surfaces to help today's customers meet their sustainability goals by extending the life cycles of buildings worldwide, while helping lower energy usage.

Tremco Roofing's restoration systems help meet sustainability goals because:

- They prolong the service life of structures for years
- Coatings are cost-effective over a second roofing layer, complying with building codes and postponing replacement for years
- There's no tear off, which eliminates landfill issues and fees and does not disrupt building occupants
- Reflectivity reduces energy consumption, the strain on HVAC systems, and a building's carbon footprint
- The Urban Heat Island Index is lowered, benefiting everyone

	<p>Colors shown approximate the appearance of the actual coating. Product finishes will vary and color chip may not represent exact finish. Factors such as type of surface, lighting, texture, sheen, and number of coats may cause color variance. Where color matching is critical, an applied sample is recommended. Custom colors are available on request.</p> <p>Minimum order quantities and custom color per gallon charges will be applied. Contact your local representative for additional information. Vibrant colors may be more susceptible to color drift or fade.</p>
