

# Ceiling Medallions

## Create a decorative ceiling medallion for any room

- Create a pattern, and draw your design directly onto the drywall.
- Using a Bladerunner or any other high end cutting tool, cut out pattern and check dimensions to make sure all pieces fit together.
- Secure drywall to ceiling and proceed with preferred beads (pictured are L Bead with Archway L Bead and Chamfer Stop).
- To create layered effect, add a second layer of drywall, making one layer slightly smaller to fit on top of the base design.
