

Decorative Column

Creating a Decorative Column with drywall

- Put an extra layer of drywall on the top and bottom of your column. You can adjust the height of the layer to fit your project (Six inches of extra drywall layer shown here)
- Use a decorative L Bead (Style 681 shown here) to connect the layers of drywall.
- Rigid Corner Bead is used to create a sharp distinctive outside corner that is easy to mud and perfect for crisp paint transitions

STOCK No.	LENGTH	Pcs. PER BOX
R008	8'	40
R009	9'	40
R010	10'	40
R012	12'	40
