

CAST CEILING PANELS

THE INDUSTRY'S LEADING MINERAL FIBER CEILING PANELS

PERFORMANCE ATTRIBUTES

Competitive Landscape

- 15% more scratch-resistant vs. competitive alternatives using the “Hess Rake Test”
- 1.5 times more durable than competitive alternatives per ASTM D1037 “Ball Drop Test”
- 60% more impact resistant than competitive alternatives per “Gardner Impact Test”

Sustainability

- Meet the CDPH Standard Method 01350 v1.2-2017 standard and have received UL GreenGuard Gold certification
- Part of the **ECOBLUEPRINT** portfolio, meeting the highest sustainability standards in the market
- USDA Certified Biobased product under USDA BioPreferred program

Sound Control

- USG Cast mineral fiber panels, including Frost™, Glacier™ and Sandrift™ panels offer balanced acoustics and noise control
- Sound absorption with NRC values up to 0.80 and sound blocking with CAC values as high as 40
- These panels absorb sound and reduce sound transmission, helping to manage noise and improve acoustical comfort, privacy and productivity

Durability

- USG Cast mineral fiber panels are manufactured to create a durable, abuse-resistant surface
- The panels resist scrapes and are perfect where access to the ceiling plenum is frequent

Integral Color

- Frost™, Glacier™ and Sandrift™ are available in any color
- The integrally color-coordinated substrate masks nicks and scrapes so blemishes fade, reducing the overall life cycle cost of the ceiling

KEY INDUSTRIES

Commercial

Frost™, Glacier™ and Sandrift™ panels are excellent choices in conference rooms and office spaces, where balanced acoustics and sound control is required.

Schools and Government Buildings

Frost™, Glacier™ and Sandrift™ panels are the best choice for durable ceilings with sound control. In busy schools, university, and government buildings, USG Cast mineral fiber panels are durable and impact-resistant which reduces the overall cost of ownership.

Corporate Accounts and National Chains

USG Cast mineral fiber panels are the ideal choice for customers wanting custom colored ceilings. From McDonald's “Yellow” to Domino's “Blue” — the ceiling panels are available in custom, integral colors, providing customers design flexibility and strengthening their brand image.
