USG Interior Panel & Finishing Solutions

Maximum Framing Spacing for Multi-Layer Application Without Adhesive Between Layers

| Location | Gypsum Panel Thickness | Gypsum Panel Orientation to Framing | Maximum Framing Spacing OC | |
|-----------------------|------------------------|-------------------------------------|----------------------------|--|
| Ceilings ¹ | 3/4 in. (19.1 mm) | Parallel | 16 in. (406 mm) | |
| | | Perpendicular | 24 in. (610 mm) | |
| Walls | 3/4 in. (19.1 mm) | Parallel | 24 in. (610 mm) | |
| | | Perpendicular | 24 in. (610 mm) | |

Note:

 On ceilings to receive water-based texture material, 3/4 in. (19.1 mm) gypsum board shall be applied either parallel to framing spaced at 16 in. (406 mm) OC or perpendicular to framing spaced maximum 24 in. (610 mm) OC. See Appendix A.3 of Gypsum Association's GA-216, Specifications for the Application and Finishing of Gypsum Panel Products for more information.

INTERIOR INSTALLATION, FINISHING AND DECORATING, CONT. FINISHING AND DECORATING

For high-quality finishing results, USG recommends USG Sheetrock® Brand finishing products.

Painting products and systems should be used that comply with recommendations and requirements in Appendices of ASTM C840. For priming and decorating with paint, texture or wall covering, follow manufacturer's directions for materials used. Gypsum Association's GA-214, *Recommended Levels of Finish for Gypsum Board, Glass Mat and Fiber-Reinforced Gypsum Panels* should be referred to in order to determine the level of finishing needed to ensure a surface properly prepared to accept the final decoration.

All surfaces, including applied joint compound, must be thoroughly dry, dust-free and not glossy. Prime with USG Sheetrock[®] Brand First Coat[™] Primer or with an undiluted, interior latex flat paint with high-solids content. Allow to dry before decorating.

To improve fastener concealment where gypsum panel walls and ceilings will be subjected to critical artificial or natural lighting, or will be decorated with a gloss paint (eggshell, semigloss or gloss), the gypsum panel should be skim coated with joint compound. This equalizes suction and texture differences between the drywall face paper and the finished joint compound before painting. When a Level 5 finish is required, use USG Sheetrock® Brand Tuff-Hide™ Primer-Surfacer. See USG Sheetrock® Brand Tuff-Hide™ Primer-Surfacer Submittal Sheet (J1613) for limitations and application instructions.

For more information, refer to USG literature *Finishing & Decorating Gypsum Panels White Paper* (J2010).
