# VERSITRIM

## VERSICO ROOF EDGE SYSTEM BENEFITS

- The full roof system is covered under one warranty, providing a single source for all warranty issues.
- Versico products are Factory Mutual approved and have also been independently tested according to the ANSI/SPRI ES-1 Wind Design Guide.
- Versico fascia products do not require stripping in of the field sheet, which prevents seams, possible delamination and potential leaks.
- Products are designed so that the Versico membrane is never penetrated below the water line.
- Arrives at the job site with all fasteners, splice plates and drivers included (sealant by others).
- VersiTrim 2000 Standard Fascia ships next day when an Express Color is selected. See a customer service representative for the Express Lead Times available on our other systems.

For specifications, CAD drawings and more product information, visit us at [www.metalera.com/versico](http://www.metalera.com/versico)

## VERSITRIM 2000 FASCIA

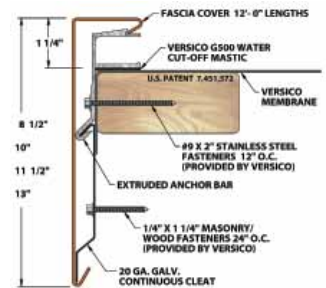

### STANDARD

- Strong extruded aluminum bar with snap-on cover.
- Installs to the outside edge of the building with no water line membrane penetrations.
- Eliminates stripping in of the metal edge.
- Provides faster installation times and labor savings.
- Fully Adhered & Mechanically Attached (version shown). Ballasted version also available.

### EXTENDED

- Larger face heights.
- Heavier gauges.
- Eliminates the need for fascia extenders saving substantial time and labor costs.

|   | up to 20 years for custom post-finish |

## VERSITRIM 2000 EXTENDED CANTED FASCIA

- Allows for the use of .050" and .063" aluminum fascia covers while keeping the flange out of the waterline.
- Pre-punched, slotted fastening holes, a non-penetrating cover attachment.
- Larger face heights that eliminate the need for fascia extenders.

Versico also offers standard coil anodized finishes in clear, medium bronze, dark bronze and black. In addition to our standard finishes, Versico can provide custom color, post-coated Kynar paint finishes and batch anodized finishes on all mill aluminum gauges listed.

Standard anodized finishes that utilize a continuous coil anodizing process to provide excellent color consistency from piece to piece are available. However, shade variations may occur from coil batch to coil batch.

**IMPORTANT NOTE: Batch anodizing is also available. Due to shade variations that occur in the anodizing process, it is recommended that the contractor work with the architect or building owner to sort and install products in the arrangement best suited to the owner's preference. We are not responsible for shade variations inherent to the anodizing process.**

### Other Available Finishes

#### Classic (Penny) Copper & Champagne Metallic

**(Champagne):** 24 ga., .040" & .050"

**RHEINZINK®:** 24-18 ga.

**Galvanized Steel (G-90 or Paint Grip):** 20 ga., 24 ga. & 22 ga.

**110 Copper:** 16 oz. & 20 oz.

**304 Stainless Steel (2B or Polished):** 20 ga., 24 ga. & 22 ga.

Kynar 500® based fluoropolymer coating is a high-grade architectural finish offering excellent resistance to degradation caused by nature's elements and airborne contaminants. A limited twenty (20) year warranty is available on the prefinished coil-coated steel and aluminum colors shown.

A limited ten (10) year warranty is included for post-painted Kynar-coated aluminum applications unless otherwise stated. A twenty (20) year warranty is also available only upon request at the time of order. Restriction may apply; consult a sales representative for specific information.

The color reproductions are as accurate as modern printing technology will permit and may vary slightly from actual colors supplied. Finished color chips samples are available upon request. Versico will not be held responsible for color selections chosen from printed literature.

By presenting this catalog, Versico does not claim to serve in any but an advisory capacity and can undertake no liability. If necessary, all recommendations contained herein regarding the use of our products should be modified to conform with local conditions and the materials employed. Versico reserves the right to make changes or to amend any of the information contained in this publication, whether to present new information obtained, or as needed to conform to a specified project, job or climactic condition.
