Benjamin Obdyke Home Slicker

Product #: W-HS

Home Slicker® Stone & Stucco is the only vertically channeled rainscreen that has been specifically designed for use with manufactured stone, natural stone, stucco and masonry applications. Each roll contains the patented Home Slicker® three-dimensional matrix bonded to a fabric that prevents mortar from entering the wall cavity during cladding installation. This product installs with the fabric facing outward.

Home Slicker® Plus Tytar® is a cost-effective, labor- and material-saving, moisture-eliminating rainscreen combined with a water-resistive barrier. Each roll contains the patented Home Slicker® three-dimensional matrix bonded to Tytar®, the premium residential and commercial grade housewrap. The unique, vertically channeled, three-dimensional matrix of the original Home Slicker® provides a continuous space for drainage and drying, a thermal break and pressure equalization—eliminating the threat of trapped moisture. Home Slicker® 10 is designed to meet the 10mm code requirements in Canada.
