Kenmat Aluminum Kickout Diverters

Product #: W-KODL

Heavy-duty, powder-coated aluminum kickout flashing diverter is made from 3003 alloy (0.040" thick), welded to create a strong, permanent, watertight joint that performs better than field-formed kickout that is sealed with caulking. Will not deteriorate like plastic flashing or breakdown due to alkali hydroxides from concrete materials. Available in Left-Hand and Right-Hand orientations.
