Showcase Your Space

With GFRG Access Panels

Stealth Access Panels are Glass Fiber Reinforced Gypsum (GFRG) ceiling and wall access panels that are designed to blend seamlessly into any drywall ceiling or wall where periodic access is required.

The panels consist of a surround frame with pre-drilled/spotted fastener holes and a drop-in door (for ceiling access) or a hinged door with a latching mechanism (for wall applications).

The hinged models offer 3 different styles of latching mechanisms (Lock-Latch, Touch Latch, or Keyless/Cam-Latch) depending on the ease of access desired.

Ideal for use in both New Construction and Retrofit Construction projects, Stealth Access Panels are available in Commercial or Residential models for Interior projects in a wide range of stock sizes as well as a host of special-order custom size configurations.

Residential models incorporate an energy-saving gasket seal that keeps air from passing through and keeps attic temperatures from infiltrating the living space.

Wind-lock also offers Exterior (FRP) models, talk to your Sales Rep for more information.

If you think Stealth Access Panels could benefit your next project, please contact us today at 800-872-5625 or email us at StealthPanels@wind-lock.com

Features & Benefits:

- Tapered Edge Frame
- Easily Textured & Paintable
- Lightweight
- Blends with Surrounding Drywall
- No Shrinkage
- No Cracking After Install
- New Construction or Retrofit Jobs
- Reduces Labor Costs

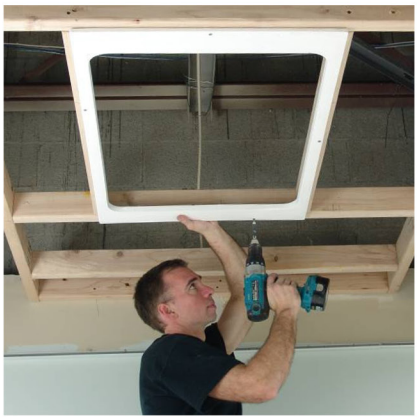
Installation Guide

Installing the Stealth Access Panel Frame:

1. Frame out location of the panel.



2. Affix panel frame by screwing it into ceiling frame using pre-marked divots.

3. Hang drywall around the panel frame.

Finishing After Drywall Installation:

1. Apply drywall mud base, covering seems and screws.

2. Apply drywall tape, also covering seems and screws.

3. Smooth drywall tape and compound with a taping knife.

4. Apply second layer of mud and smooth with a taping knife.

5. Once dry, smooth tape joints and install your panel door.
