Wind-lock Hinged Stealth GFRG Access Panels for Drywall

Product #: TR-HAP009

Hinged GFRG Stealth Access Panels are an attractive alternative to locking metal and plastic access panels. The glass-fiber-reinforced-gypsum (GFRG) won't rust or warp, and will accept any type of finish for a seamless blend. Hinged Stealth Access Panels can be easily installed in new construction or retrofitted to drywall walls and ceilings. The design of the panel ensures that your aesthetic style is noticed, and not your access panels.

Need a more detailed look? **Our Stealth E-Binder** shows example applications, product details for Architects & Specifiers, as well as installation instructions.
