

Cavity Net and Cavity Net DT

Safety Data Sheets- OSHA 1910.1200

Cavity Net and Cavity Net DT are considered “articles” as defined by the Department of Labor. OSHA 1910.1200(c) definitions are as follows:

“Article” means a manufactured item other than a fluid or a particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not re-lease more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as de-termined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

“Articles” are exempt from OSHA’s Hazard Communication Standard and the Globally Harmonized System and therefore WIRE-BOND is not required to generate “Safety Data Sheets” for the products manufactured nor comply with the new labeling requirements.
